David Leandro Calvo Salazar

SENIOR SOFTWARE ENGINEER

+57 3017861606 • davidcalvopei@gmail.com • LinkedIn • Pereira, Risaralda, Colombia

SUMMARY

With over 10 years of extensive experience in developing scalable, high-performance web applications, I bring deep expertise in both front-end and back-end technologies. On the front-end, I specialize in Angular, RxJS, and Next.js, while building robust and scalable back-end solutions using Node.js, NestJS and Express.js. I have a proven track record of designing distributed systems and containerized microservices using Docker and Kubernetes, ensuring seamless integration, scalability, and performance optimization across services. My software development approach is rooted in a strong commitment to Agile/Scrum methodologies, focusing on CI/CD pipelines and continuous delivery practices to accelerate development cycles and ensure reliable, high-quality releases. I thrive in collaborative environments, working closely with cross-functional teams and stakeholders to transform complex business requirements into high-performance, actionable solutions.

As a mentor and leader, I am passionate about fostering a culture of continuous learning, maintaining high standards of code quality, and driving innovation within development teams. I regularly conduct code reviews, champion best practices, and focus on continuous process improvements to ensure successful project delivery and high-quality software development outcomes.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Rootstack

09.2022 – 07.2025

- Collaborated with UI/UX designers, project managers, and stakeholders to define requirements, ensuring the creation of user-centric solutions aligned with business goals.
- Designed and developed responsive, dynamic user interfaces using Angular, ensuring cross-platform compatibility and delivering a seamless, optimized user experience on all devices.
- Engineered scalable back-end services using Node.js with Express.js, NestJS, leveraging microservices architecture and deploying solutions on cloud platforms such as AWS and Azure.
- Implemented efficient inter-service communication through RabbitMQ, ensuring smooth data flow and real-time processing across microservices, enhancing system reliability and scalability.
- Integrated Azure Media Services for delivering high-quality live video streaming, driving customer engagement and ensuring real-time content accessibility.
- Leveraged Azure Cloud Storage to implement auto-save functionality, providing data persistence and improving user experience by reducing the risk of data loss.
- Developed an AI-powered chatbot for an e-commerce platform, utilizing Machine Learning, Deep Learning, and Natural Language Processing (NLP), enhancing customer interaction and support services.
- Established and maintained a comprehensive CI/CD pipeline using Azure DevOps, integrating automated unit testing (e.g., Jest) and end-to-end testing (e.g., Cypress), accelerating deployment cycles and ensuring reliable software delivery.
- Actively contributed to Agile Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives, promoting collaboration and ensuring high-quality, timely delivery of software.
- Led mentorship initiatives, conducted regular code reviews, and fostered a culture of continuous learning, sharing best practices, and driving technical excellence within the team.

Technical Skills & Technologies: Angular, TypeScript, JavaScript, Node.js, Express.js, NestJS, RESTful APIs, GraphQL, MySQL, PostgreSQL, MongoDB, AWS, Azure (App Service, Media Services, Cloud Storage, Cosmos DB, API Gateway), RabbitMQ, WebSockets, Docker, Kubernetes, Jest, Cypress, Mocha, Jenkins, GitHub Actions, Agile Scrum, CI/CD, TDD, Machine Learning, Deep Learning, NLP

Full Stack Developer

Gorilla Logic

08.2020 – 08.2022

- Developed a scalable web application using Angular for the front-end and Node.js with Express.js for the back-end, driving a 30% increase in user engagement by optimizing both UI and back-end performance.
- Contributed to the complete software development lifecycle, collaborating closely with stakeholders to define requirements, design solutions, and deploy features in an Agile environment.
- Integrated Angular components to efficiently manage application lifecycle events, ensuring system stability and delivering an enhanced user experience.
- Optimized back-end performance by improving database interactions, utilizing Sequelize ORM (for Node.js) or MongoDB to reduce server load, ensure faster query execution, and improve application responsiveness.
- Implemented third-party platform integrations for document management, improving internal communication and productivity across teams.
- Designed and implemented a responsive UI using Material UI and Chakra UI, ensuring cross-platform compatibility and delivering a seamless user experience.
- Integrated real-time communication features via WebSockets and implemented APIs such as Stripe, Google Maps, and Twilio, enriching application functionality and enhancing user engagement.
- Deployed applications in a cloud-native environment using Microsoft Azure services, including App Service, Blob Storage, and Cosmos DB, ensuring scalability, security, and high availability.
- Containerized microservices with Docker and orchestrated deployments with Kubernetes and Helm, streamlining the deployment process and improving scalability.
- Mentored junior developers, conducted regular code reviews, and fostered a culture of best practices to ensure high-quality code and efficient team collaboration.

Technical Skills & Technologies: Angular, TypeScript, JavaScript, Node.js, Express.js, Sequelize ORM, MongoDB, RESTful APIs, Microservices Architecture, Azure (App Service, Blob Storage, Cosmos DB), Docker, Kubernetes, Helm, WebSockets, Stripe API, Google Maps API, Twilio API, Cypress, Jest, Jenkins, Git, CI/CD, Agile Scrum, TDD, Code Reviews

Senior Web Developer

SophosSolution

02.2018 – 06.2020

- Developed a high-traffic e-commerce platform using Angular for the front-end and Node.js with Express.js for the back-end, incorporating Test-Driven Development (TDD) practices, resulting in a 20% increase in user engagement.
- Integrated multiple third-party APIs, including payment gateways and accounting systems, ensuring seamless interaction with external services and enhancing the platform's functionality.
- Architected and implemented a Microservices architecture using Node.js and Express.js, with RabbitMQ enabling inter-service communication and GraphQL APIs optimizing data exchange between the front-end and back-end.
- Developed real-time notification systems using WebSockets and integrated with AWS SNS, significantly improving user interaction and application responsiveness.
- Contributed to database design and optimization using PostgreSQL and Sequelize ORM (for Node.js), ensuring data integrity, high performance, and scalability.
- Deployed and scaled the e-commerce platform featuring live video streaming, leveraging AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito, ensuring scalability and security.
- Implemented CI/CD pipelines using AWS CodePipeline, automating build, test, and deployment processes, which reduced manual errors and accelerated release cycles.
- Actively participated in Agile/Scrum practices, including sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of high-quality software and promoting team collaboration.

Technical Skills & Technologies: Angular, TypeScript, JavaScript, Node.js, Express.js, Sequelize ORM, PostgreSQL, GraphQL, RESTful APIs, Microservices Architecture, AWS (SNS, IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, Cognito), WebSockets, RabbitMQ, Cypress, Jest, AWS CodePipeline, Git, Git Bash, TDD, Agile Scrum, Code Reviews

Web Developer

N-iX

09.2015 – 02.2018

- Developed a high-traffic e-commerce platform using Angular for the front-end and Node.js with Express.js for the back-end, incorporating Test-Driven Development (TDD), which led to a 20% increase in user engagement.
- Integrated multiple third-party APIs, including payment gateways and accounting systems, ensuring seamless interactions with external services and enhancing the platform's functionality.
- Architected and implemented Microservices architecture using Node.js and Express.js, with RabbitMQ for inter-service communication and GraphQL for optimized data exchange between the front-end and back-end.
- Developed real-time notification systems using WebSockets and integrated with AWS SNS and Lambda, significantly improving application responsiveness and user engagement.
- Contributed to database design and optimization using PostgreSQL and Sequelize ORM (for Node.js), ensuring data integrity, performance, and scalability.
- Engineered live video streaming features for the e-commerce platform, leveraging AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito, ensuring scalable and secure media delivery.
- Established CI/CD pipelines with AWS CodePipeline, automating build, test, and deployment processes, reducing manual errors, and accelerating release cycles.
- Actively participated in Agile/Scrum practices, contributing to sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of high-quality software and fostering collaboration across teams.

Technical Skills & Technologies: Angular, TypeScript, JavaScript, Node.js, Express.js, Sequelize ORM, PostgreSQL, GraphQL, RESTful APIs, Microservices Architecture, AWS (SNS, IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, Cognito), WebSockets, RabbitMQ, Jest, Cypress, Mocha, AWS CodePipeline, Git, Git Bash, TDD, Agile Scrum, Code Reviews

EDUCATION

Universidad Católica de Pereira

04.2011 – 09.2015

Bachelor of Computer Science

SKILLS

Languages:	JavaScript(ES6), Typescript, C++, HTML5, CSS3, PHP, Tailwind CSS
Frameworks and Libraries:	Angular, React.js, Next.js, Storybook, Material UI, Ant Design, Chakra UI, Angular Material, RxJS,React-Admin, Node, Express.js, NestJS, REST API, GraphQL, RabbitMQ, Kafka
Database Management System:	Firebase, MongoDB, AWS DynamoDB, MySQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Figma, Terraform, Docker, Kubernetes, Jenkins, Cypress, Jest, Jasmine, NgRx, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, Google Cloud Computing (GCP)
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
