David Leandro Calvo Salazar

SENIOR SOFTWARE ENGINEER

+57 3017861606 • davidcalvopei@gmail.com • LinkedIn • Pereira, Risaralda, Colombia

SUMMARY

With over 10 years of extensive experience in developing scalable and high-performance web applications, I possess deep expertise in both front-end and back-end technologies. On the front-end, I specialize in Angular, RxJS, and Next.js, while building robust, scalable back-end solutions using Python (Django, Flask). I have a strong background in designing distributed systems and containerized microservices using Docker and Kubernetes, ensuring seamless integration and scalability across services. My commitment to delivering high-quality software is reflected in my consistent adoption of Agile/Scrum methodologies, with a particular emphasis on CI/CD pipelines and continuous delivery practices.

I thrive in collaborative environments, working closely with cross-functional teams and stakeholders to transform complex business requirements into efficient, practical solutions. My leadership experience includes mentoring junior developers, conducting thorough code reviews, and establishing a culture of best practices, maintaining high standards of code quality and fostering continuous improvement. Passionate about innovation, I am dedicated to driving team performance and contributing to the evolution of software development processes.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Rootstack

09.2022 – 07.2025

- Collaborated closely with UI/UX designers, project managers, and stakeholders to gather and refine requirements, ensuring seamless integration of user-centric solutions that align with business objectives.
- Designed and developed responsive, dynamic user interfaces with Angular, ensuring cross-platform compatibility and optimized user experiences across devices.
- Engineered scalable back-end services using Python (Flask/Django), applying best practices for Microservices architecture, and deploying solutions on cloud platforms like AWS and Azure for streamlined operations.
- Implemented efficient inter-service communication through RabbitMQ, ensuring smooth data flow and real-time processing across microservices, contributing to a more robust system architecture.
- Integrated Azure Media Services to deliver high-quality live video streaming, enhancing customer engagement and content accessibility in real time.
- Utilized Azure Cloud Storage to implement an auto-save functionality, ensuring data persistence and easy recovery, improving user experience and reducing data loss risks.
- Developed an AI-powered chatbot for an e-commerce platform, leveraging Machine Learning, Deep Learning, and Natural Language Processing (NLP), enhancing customer interaction and support services.
- Established and maintained a comprehensive CI/CD pipeline using Azure DevOps, integrating unit testing (e.g., PyTest) and end-to-end testing (Cypress) to significantly enhance development speed and deployment accuracy.
- Actively contributed to Agile Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives, promoting a collaborative development culture and ensuring timely delivery of high-quality software.
- Led mentorship efforts, conducted regular code reviews, and fostered a culture of continuous learning, knowledge sharing, and technical excellence within the development team.

Technical Skills & Technologies: Angular, Material UI, JavaScript, TypeScript, HTML5, CSS3, Python, Flask, Django, RESTful APIs, Microservices Architecture, Azure (App Service, Media Services, Cloud Storage), AWS, RabbitMQ, WebSockets, PyTest, Cypress, Azure DevOps, Jenkins, Machine Learning, Deep Learning, Natural Language Processing (NLP), Git, Git Bash, PowerShell, Agile Scrum, Code Reviews, TDD

Full Stack Developer

Gorilla Logic

08.2020 – 08.2022

- Designed and developed a scalable web application using Angular for the front-end and Python (Flask/Django) for the back-end, achieving a 30% increase in user engagement by optimizing both the UI and backend performance.
- Took part in the complete software development lifecycle, collaborating with stakeholders to define requirements, design solutions, and deploy features within an Agile framework.
- Integrated Angular components to efficiently manage application lifecycle events, ensuring system stability and an enhanced user experience.
- Optimized backend performance by refining database interactions, utilizing SQLAlchemy (for Flask) or Django ORM to reduce server load, ensure faster query execution, and improve application responsiveness.
- Implemented third-party platform integration for document management, improving internal communication and team productivity.
- Designed and implemented a responsive UI using Material UI and Chakra UI, ensuring consistent performance across modern browsers and devices.
- Added real-time communication capabilities via WebSockets and integrated third-party APIs such as Stripe, Google Maps, and Twilio, enriching functionality and extending application capabilities.
- Deployed applications in a cloud-native environment using Microsoft Azure services, including App Service, Blob Storage, and Cosmos DB, ensuring scalability, security, and high availability.
- Containerized microservices with Docker and orchestrated deployments using Kubernetes and Helm, streamlining deployment processes and enhancing scalability.
- Mentored junior developers, conducted regular code reviews, and fostered a culture of best practices, ensuring high-quality code and seamless team collaboration.

Technical Skills & Technologies: Angular, Material UI, Chakra UI, JavaScript, TypeScript, HTML5, CSS3, SASS, Python (Flask, Django), SQLAlchemy, Django ORM, RESTful APIs, Microservices Architecture, Microsoft Azure (App Service, Blob Storage, Cosmos DB), WebSockets, Stripe API, Google Maps API, Twilio API, Docker, Kubernetes, Helm, Cypress, Jest, Git, Git Bash, PowerShell, CI/CD, TDD, Agile Scrum, Code Reviews

Senior Web Developer

SophosSolution

02.2018 – 06.2020

- Developed a high-traffic e-commerce platform using Angular for the front-end and Python (Flask/Django) for the back-end, incorporating Test-Driven Development (TDD) practices, resulting in a 20% increase in user engagement.
- Integrated multiple third-party APIs, including payment gateways and accounting systems, ensuring seamless interaction with external services and enhancing platform functionality.
- Architected and implemented a Microservices architecture using Python (Flask/Django), with RabbitMQ enabling inter-service communication and GraphQL APIs optimizing data exchange between the front-end and back-end.
- Developed real-time notification systems with WebSockets and AWS SNS, significantly improving user interaction and application responsiveness.
- Contributed to database design and optimization using PostgreSQL and SQLAlchemy, ensuring data integrity, high performance, and scalability.
- Deployed and scaled an e-commerce platform featuring live video streaming, leveraging AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito, ensuring enhanced scalability and security.
- Implemented CI/CD pipelines using AWS CodePipeline, automating build, test, and deployment processes, reducing manual errors and accelerating release cycles.
- Actively participated in Agile/Scrum practices, including sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of high-quality software and promoting team collaboration.

Technical Skills & Technologies: Angular, Material UI, JavaScript, TypeScript, HTML5, CSS3, SASS, Python (Flask, Django), PostgreSQL, SQLAlchemy, RESTful APIs, Microservices Architecture, GraphQL, AWS, WebSockets, RabbitMQ, AWS CodePipeline, Cypress, Jest, Git, Git Bash, PowerShell, TDD, Agile Scrum, Code Reviews

Web Developer

N-iX

09.2015 – 02.2018

- Built a high-traffic e-commerce platform utilizing Angular for the front-end and Python (Flask/Django) for the back-end in a TDD environment, achieving a 20% increase in user engagement.
- Integrated multiple third-party APIs, including payment gateways and accounting systems, ensuring seamless interaction with external services and enhancing platform functionality.
- Architected and implemented a Microservices architecture using Python (Flask/Django), with AWS SQS for inter-service communication and GraphQL for optimized data exchange between front-end and back-end.
- Developed real-time notification systems leveraging AWS SNS and Lambda, significantly improving application responsiveness and user engagement.
- Contributed to database design and optimization using PostgreSQL and SQLAlchemy, enhancing data integrity, performance, and scalability for the e-commerce platform.
- Engineered live video streaming for the e-commerce platform using AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito, ensuring scalable and secure media delivery.
- Established CI/CD pipelines with AWS CodePipeline, automating build, test, and deployment processes, accelerating release cycles and minimizing manual errors.
- Actively engaged in Agile/Scrum practices, contributing to sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of high-quality software and promoting team collaboration.

Technical Skills & Technologies: Angular, Material UI, JavaScript, TypeScript, HTML5, CSS3, SASS, SCSS, Python (Flask, Django), PostgreSQL, SQLAlchemy, RESTful APIs, Microservices Architecture, GraphQL, AWS (SNS, Lambda, IVS, DynamoDB, API Gateway, S3, EC2, Amplify, Cognito, SQS), WebSockets, Jest, Cypress, Mocha, AWS CodePipeline, Git, Git Bash, PowerShell, TDD, Agile Scrum, Code Reviews

EDUCATION

Universidad Católica de Pereira

04.2011 – 09.2015

Bachelor of Computer Science

SKILLS

Languages:	JavaScript(ES6), Typescript, C++, HTML5, CSS3, PHP, Tailwind CSS
Frameworks and Libraries:	Angular, React.js, Next.js, Storybook, Material UI, Ant Design, Chakra UI, Angular Material, RxJS,React-Admin, Python (Flask, Django), REST API, GraphQL, RabbitMQ, Kafka
Database Management System:	Firebase, MongoDB, AWS DynamoDB, MySQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Figma, Terraform, Docker, Kubernetes, Jenkins, Cypress, Jest, Jasmine, NgRx, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, Google Cloud Computing (GCP)
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
