David Leandro Calvo Salazar

SENIOR SOFTWARE ENGINEER

+57 3017861606 • davidcalvopei@gmail.com • LinkedIn • Pereira, Risaralda, Colombia

SUMMARY

With over 10 years of hands-on experience in developing scalable, high-performance web applications, I bring a deep expertise in both front-end and back-end development. My core strengths lie in modern JavaScript frameworks like React.js, Next.js, and Redux for the front-end, coupled with robust .NET technologies including ASP.NET MVC, .NET Core, and Blazor for building scalable back-end solutions.

I excel in distributed systems and containerization using Docker, and I am committed to delivering quality software through consistent adoption of Agile/Scrum practices. I am particularly adept at transforming complex requirements into actionable, efficient solutions through close collaboration and a strong capacity for independent problem-solving.

As a proactive and communicative team player, I have a proven track record of leading development efforts, conducting detailed code reviews, and working closely with project managers and stakeholders to ensure the timely and successful delivery of projects. Passionate about fostering a culture of clean, maintainable, and scalable code, I am dedicated to improving team performance, mentoring junior developers, and continuously driving innovation within development teams.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Rootstack

09.2022 – 07.2025

- Collaborated closely with UI/UX designers, project managers, and stakeholders to gather and refine requirements, ensuring the seamless integration of user-centric solutions that align with business goals.
- Designed and developed responsive, dynamic user interfaces with React & Next, ensuring cross-platform compatibility and delivering an optimized user experience.
- Built and optimized scalable .NET Core back-end services using C# and ASP.NET Core, applying best practices for Microservices architecture and deploying solutions on Azure App Service to ensure high availability and performance.
- Implemented efficient inter-service communication through RabbitMQ, ensuring smooth data flow and real-time processing across services in the microservices architecture.
- Integrated Azure Media Services to deliver high-quality live video streaming, enhancing customer engagement with seamless and scalable media delivery.
- Utilized Azure Cloud Storage to implement auto-save functionality, enhancing the user experience by ensuring data persistence and easy recovery.
- Developed an AI-powered chatbot for an e-commerce platform using Machine Learning, Deep Learning, and Natural Language Processing (NLP) to increase customer interaction and support efficiency.
- Established and maintained a comprehensive CI/CD pipeline using Azure DevOps, integrating NUnit for unit testing and Cypress for end-to-end testing, improving development speed and reducing deployment errors.
- Actively contributed to Agile Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives, ensuring the timely delivery of high-quality software and promoting team collaboration.
- Led mentorship efforts by conducting regular code reviews, driving a culture of continuous learning, and promoting knowledge sharing within the development team.

Technical Skills & Technologies: React, Next, JavaScript, TypeScript, HTML5, CSS3, .NET Core, C#, ASP.NET Core, Microservices Architecture, Azure App Service, Azure Media Services, Azure Cloud Storage, RabbitMQ, WebSockets, Cypress, NUnit, Azure DevOps, Git, Git Bash, PowerShell, Machine Learning, Deep Learning, Natural Language Processing (NLP), Agile Scrum, CI/CD, TDD, Code Reviews.

Full Stack Developer

Gorilla Logic

08.2020 – 08.2022

- Designed and developed a scalable web application using React & Next for the front-end and .NET Core for the back-end, driving a 30% increase in user engagement by optimizing both UI and backend performance.
- Led the full software development lifecycle, collaborating with stakeholders to define requirements, design solutions, and deploy features in an Agile environment.
- Integrated React Hooks in relevant components to manage application lifecycle events, improving system stability, reducing re-renders, and enhancing the user experience.
- Optimized backend performance by refining database interactions using Entity Framework, reducing server load and ensuring faster query execution, which improved overall application responsiveness.
- Implemented SharePoint integration with ASP.NET, creating a collaborative platform for document management and improving internal communication across teams.
- Designed and implemented a responsive UI with Chakra UI, ensuring seamless performance across modern browsers and devices and providing a consistent user experience.
- Enhanced application capabilities by integrating real-time communication via SignalR, and added third-party APIs (e.g., GoodRx, Stripe, Google Maps, Twilio) to enrich functionality and improve user interaction.
- Deployed applications in a cloud-native environment using Microsoft Azure services (App Service, Blob Storage, Cosmos DB) to ensure scalability, high availability, and security.
- Containerized microservices with Docker and orchestrated deployments using Kubernetes and Helm, streamlining deployment processes and improving overall scalability.
- Mentored junior developers, led regular code reviews, and championed best practices to maintain high-quality code, foster team collaboration, and ensure the successful delivery of features.

Technical Skills & Technologies: Next, React, React Hooks, Chakra UI, Redux, JavaScript, TypeScript, HTML5, CSS3, SASS, .NET Core, ASP.NET, Entity Framework, RESTful APIs, Microservices Architecture, Microsoft Azure (App Service, Blob Storage, Cosmos DB), SignalR, WebSockets, Kafka, Cypress, Jest, Docker, Kubernetes, Helm, SharePoint, Stripe API, Google Maps API, Twilio API, Git, Git Bash, PowerShell, Agile Scrum, CI/CD, TDD, Code Reviews.

Senior Web Developer

SophosSolution

02.2018 – 06.2020

- Developed a high-traffic e-commerce platform using React&Next for the front-end and .NET for the back-end, adopting Test-Driven Development (TDD) practices, which led to a 20% increase in user engagement.
- Integrated third-party APIs, ensuring seamless interactions with external services and extending the platform's capabilities.
- Architected and implemented a Microservices architecture using .NET, with AWS SQS enabling inter-service communication and GraphQL APIs optimizing data exchange between the front-end and back-end.
- Built real-time notification systems leveraging AWS SNS and AWS Lambda, significantly improving application responsiveness and user interaction.
- Contributed to database design and optimization using MS SQL and Entity Framework, ensuring robust data integrity, performance, and scalability for the platform.
- Deployed and scaled the e-commerce platform featuring live video streaming, utilizing AWS services (IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, Cognito) to ensure scalability, security, and high performance.
- Implemented CI/CD pipelines using AWS CodePipeline, automating build, test, and deployment processes to accelerate release cycles and reduce errors.
- Actively participated in Agile/Scrum practices, including sprint planning, daily stand-ups, and retrospectives, ensuring the timely delivery of high-quality software and fostering a collaborative team environment.

Technical Skills & Technologies: React, JavaScript, TypeScript, HTML5, CSS3, SASS, .NET Core, ASP.NET, Entity Framework, RESTful APIs, Microservices Architecture, GraphQL, AWS (SQS, SNS, Lambda, IVS, DynamoDB, API Gateway, S3, EC2, Amplify, Cognito), MS SQL, SignalR, WebSockets, Kafka, Cypress, Jest, Docker, Kubernetes, Helm, CI/CD, TDD, Agile Scrum.

Web Developer

N-iX

09.2015 – 02.2018

- Developed a high-traffic e-commerce platform leveraging React for the front-end and .NET MVC/.NET Core for the back-end, using Test-Driven Development (TDD) practices, which led to a 20% increase in user engagement through optimized UI and back-end performance.
- Integrated multiple third-party APIs, including payment gateways and accounting systems, ensuring seamless communication between external services and enhancing overall platform functionality.
- Architected and implemented a Microservices architecture using .NET Core, incorporating AWS SQS for efficient inter-service communication and GraphQL to optimize data exchange between the front-end and back-end.
- Developed real-time notification systems using AWS SNS and Lambda, significantly improving user interaction and application responsiveness.
- Contributed to database design and optimization using MS SQL and Entity Framework, enhancing data integrity, performance, and scalability for the e-commerce platform.
- Engineered live video streaming features using AWS services (IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, Cognito) to ensure scalable, secure media delivery for end-users.
- Established CI/CD pipelines with AWS CodePipeline, automating build, test, and deployment processes, improving release cycles and reducing manual errors.
- Actively contributed to Agile/Scrum practices, participating in sprint planning, daily stand-ups, and retrospectives, ensuring the timely delivery of high-quality software and promoting team collaboration.

Technical Skills & Technologies: React.js, .NET Core, ASP.NET MVC, JavaScript, TypeScript, HTML5, CSS3, SASS, Redux, GraphQL, WebAPI, Microservices Architecture, AWS (SQS, SNS, Lambda, IVS, DynamoDB, API Gateway, S3, EC2, Amplify, Cognito), MS SQL, Entity Framework, WebSockets, Jest, Cypress, Mocha, AWS CodePipeline, Git, Git Bash, PowerShell, Test-Driven Development (TDD), Agile Scrum, CI/CD.

EDUCATION

Universidad Católica de Pereira

04.2011 – 09.2015

Bachelor of Computer Science

SKILLS

Languages:	JavaScript(ES6), Typescript, C++, HTML5, CSS3, PHP, Tailwind CSS
Frameworks and Libraries:	React.js, Next.js, Storybook, Material UI, Ant Design, Chakra UI, Redux, .NET Core, .NET MVC, REST API, GraphQL, RabbitMQ, Kafka
Database Management System:	Firebase, MongoDB, AWS DynamoDB, MySQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Figma, Terraform, Docker, Kubernetes, Jenkins, Cypress, Jest, Jasmine, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, Google Cloud Computing (GCP)
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
