David Leandro Calvo Salazar

SENIOR SOFTWARE ENGINEER

+57 3017861606 • davidcalvopei@gmail.com • LinkedIn • Pereira, Risaralda, Colombia

SUMMARY

With over 10 years of extensive experience in developing scalable, high-performance web applications, I bring deep expertise in both front-end and back-end technologies. On the front-end, I specialize in React and Next.js, while creating robust and scalable back-end solutions using PHP frameworks like Laravel and Symfony. I have a proven track record of designing distributed systems and containerized microservices using Docker and Kubernetes, ensuring seamless integration and scalability across services. My approach to software development is driven by a strong commitment to Agile/Scrum methodologies and a focus on CI/CD pipelines and continuous delivery practices. I thrive in collaborative environments, working closely with cross-functional teams and stakeholders to transform complex business requirements into actionable, high-performance solutions.

As a mentor and leader, I am passionate about fostering a culture of continuous learning, maintaining high standards of code quality, and driving innovation within development teams. I regularly conduct thorough code reviews, champion best practices, and continuously improve the development process, ensuring successful project outcomes.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Rootstack

09.2022 – 07.2025

- Collaborated closely with UI/UX designers, project managers, and stakeholders to gather and refine requirements, ensuring seamless integration of user-centric solutions that align with business objectives.
- Designed and developed responsive, dynamic user interfaces using React & Next, ensuring cross-platform compatibility and delivering optimized user experiences across devices.
- Engineered scalable back-end services using PHP frameworks (e.g., Laravel, Symfony), applying best practices for Microservices architecture, and deploying solutions on cloud platforms like AWS and Azure for streamlined operations.
- Implemented efficient inter-service communication through RabbitMQ, ensuring smooth data flow and real-time processing across microservices, contributing to a more robust system architecture.
- Integrated Azure Media Services to deliver high-quality live video streaming, enhancing customer engagement and content accessibility in real time.
- Utilized Azure Cloud Storage to implement auto-save functionality, ensuring data persistence and easy recovery, improving the user experience and reducing data loss risks.
- Developed an AI-powered chatbot for an e-commerce platform, leveraging Machine Learning, Deep Learning, and Natural Language Processing (NLP), enhancing customer interaction and support services.
- Established and maintained a comprehensive CI/CD pipeline using Azure DevOps, integrating unit testing (e.g., PHPUnit) and end-to-end testing (Cypress) to significantly enhance development speed and deployment accuracy.
- Actively contributed to Agile Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives, fostering a collaborative development culture and ensuring timely delivery of high-quality software.
- Led mentorship efforts, conducted regular code reviews, and fostered a culture of continuous learning, knowledge sharing, and technical excellence within the development team.

Technical Skills & Technologies: React, Next, Material UI, JavaScript, TypeScript, HTML5, CSS3, PHP (Laravel, Symfony), RESTful APIs, Microservices Architecture, MySQL, PostgreSQL, Azure (App Service, Media Services, Cloud Storage), AWS, Docker, Kubernetes, RabbitMQ, WebSockets, PHPUnit, Cypress, PyTest, Machine Learning, Deep Learning, Natural Language Processing (NLP), Agile Scrum, TDD, Code Reviews, Git, Git Bash, PowerShell.

Full Stack Developer

Gorilla Logic

08.2020 – 08.2022

- Developed a scalable web application using React and NextJS for the front-end and PHP frameworks (Laravel/Symfony) for the back-end, driving a 30% increase in user engagement by optimizing both UI and backend performance.
- Contributed to the complete software development lifecycle, collaborating with stakeholders to define requirements, design solutions, and deploy features in an Agile environment.
- Integrated React components to efficiently manage application lifecycle events, ensuring system stability and delivering an enhanced user experience.
- Optimized back-end performance by improving database interactions, leveraging EloquentORM (for Laravel) or DoctrineORM to reduce serverload, ensure faster query execution and improve application responsiveness.
- Implemented third-party platform integrations for document management, improving internal communication and productivity across teams.
- Designed and implemented a responsive UI using Material UI and Chakra UI, ensuring cross-platform compatibility and delivering a seamless user experience.
- Implemented real-time communication features via WebSockets and integrated APIs such as Stripe, Google Maps, and Twilio to enrich application functionality.
- Deployed applications in a cloud-native environment using Microsoft Azure services, including App Service, Blob Storage, and Cosmos DB, ensuring scalability, security, and high availability.
- Containerized microservices using Docker and orchestrated deployments with Kubernetes and Helm, streamlining the deployment process and improving scalability.
- Mentored junior developers, conducted regular code reviews, and fostered a culture of best practices to ensure high-quality code and efficient team collaboration.

Technical Skills & Technologies: React, Next, Material UI, Chakra UI, JavaScript, TypeScript, HTML5, CSS3, SASS, PHP (Laravel, Symfony), Eloquent ORM, Doctrine ORM, RESTful APIs, Microservices Architecture, Microsoft Azure, WebSockets, Stripe API, Google Maps API, Twilio API, Docker, Kubernetes, Helm, Cypress, Jest, Git, Git Bash, CI/CD, TDD, Agile Scrum, Code Reviews.

Senior Web Developer

SophosSolution

02.2018 – 06.2020

- Developed a high-traffic e-commerce platform using React for the front-end and Laravel for the back-end, incorporating Test-Driven Development (TDD) practices, which resulted in a 20% increase in user engagement.
- Integrated multiple third-party APIs, including payment gateways and accounting systems, ensuring seamless interaction with external services and enhancing the platform's functionality.
- Architected and implemented a Microservices architecture using Laravel, with RabbitMQ enabling inter-service communication and GraphQL APIs optimizing data exchange between the front-end and back-end.
- Developed real-time notification systems using WebSockets and integrated with AWS SNS, significantly improving user interaction and application responsiveness.
- Contributed to database design and optimization using PostgreSQL and Eloquent ORM (for Laravel), ensuring data integrity, high performance, and scalability.
- Deployed and scaled the e-commerce platform featuring live video streaming, leveraging AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito, ensuring scalability and security.
- Implemented CI/CD pipelines using AWS CodePipeline, automating build, test, and deployment processes, which reduced manual errors and accelerated release cycles.
- Actively participated in Agile/Scrum practices, including sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of high-quality software and promoting team collaboration.

Technical Skills & Technologies: React, Material UI, JavaScript, TypeScript, HTML5, CSS3, SASS, Laravel, Eloquent ORM, PostgreSQL, RESTful APIs, Microservices Architecture, GraphQL, AWS (SNS, IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify), WebSockets, RabbitMQ, Cypress, Jest, Git, Git Bash, PowerShell, TDD, Agile Scrum, Code Reviews.

Web Developer

N-iX

09.2015 – 02.2018

- Built a high-traffic e-commerce platform utilizing React for the front-end and PHP frameworks (Laravel/Symfony) for the back-end, leveraging Test-Driven Development (TDD), which led to a 20% increase in user engagement.
- Integrated multiple third-party APIs, including payment gateways and accounting systems, ensuring seamless interactions with external services and enhancing the platform's functionality.
- Architected and implemented Microservices architecture using PHP (Laravel/Symfony), with RabbitMQ for inter-service communication and GraphQL for optimized data exchange between the front-end and back-end.
- Developed real-time notification systems using WebSockets and integrated with AWS SNS and Lambda, significantly enhancing application responsiveness and user engagement.
- Contributed to database design and optimization using PostgreSQL and Eloquent ORM (for Laravel) or Doctrine ORM (for Symfony), ensuring data integrity, performance, and scalability.
- Engineered live video streaming features for the e-commerce platform leveraging AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito, ensuring scalable and secure media delivery.
- Established CI/CD pipelines with AWS CodePipeline, automating build, test, and deployment processes, reducing manual errors, and accelerating release cycles.
- Actively participated in Agile/Scrum practices, contributing to sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of high-quality software and fostering collaboration across teams.

Technical Skills & Technologies: React, Material UI, JavaScript, TypeScript, HTML5, CSS3, SASS, PHP (Laravel, Symfony), Eloquent ORM, Doctrine ORM, PostgreSQL, RESTful APIs, Microservices Architecture, GraphQL, AWS (SNS, Lambda, IVS, DynamoDB, API Gateway, S3, EC2, Amplify, Cognito, SQS), WebSockets, Jest, Cypress, Mocha, AWS CodePipeline, Git, Git Bash, PowerShell, TDD, Agile Scrum, Code Reviews.

EDUCATION

Universidad Católica de Pereira

04.2011 – 09.2015

Bachelor of Computer Science

SKILLS

Languages:	JavaScript(ES6), Typescript, C++, HTML5, CSS3, PHP, Tailwind CSS
Frameworks and Libraries:	React.js, Next.js, Storybook, Material UI, Ant Design, Chakra UI, Redux ,React-Admin, PHP (Laravel/Symfony), REST API, GraphQL, RabbitMQ, Kafka
Database Management System:	Firebase, MongoDB, AWS DynamoDB, MySQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Figma, Terraform, Docker, Kubernetes, Jenkins, Cypress, Jest, Jasmine, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, Google Cloud Computing (GCP)
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
