David Leandro Calvo Salazar

SENIOR SOFTWARE ENGINEER

+57 3017861606 • davidcalvopei@gmail.com • LinkedIn • Pereira, Risaralda, Colombia

SUMMARY

With over 10 years of hands-on experience in developing scalable, high-performance web applications, I bring a deep expertise in both front-end and back-end development. My core strengths lie in modern JavaScript frameworks like Vue.js, Vuex, ReactJS and NextJS for the front-end, coupled with robust .NET technologies including ASP.NET MVC, .NET Core, and Blazor for building scalable back-end solutions.

I excel in distributed systems and containerization using Docker, and I am committed to delivering quality software through consistent adoption of Agile/Scrum practices. I am particularly adept at transforming complex requirements into actionable, efficient solutions through close collaboration and a strong capacity for independent problem-solving.

As a proactive and communicative team player, I have a proven track record of leading development efforts, conducting detailed code reviews, and working closely with project managers and stakeholders to ensure the timely and successful delivery of projects. Passionate about fostering a culture of clean, maintainable, and scalable code, I am dedicated to improving team performance, mentoring junior developers, and continuously driving innovation within development teams.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Rootstack

09.2022 – 07.2025

- Collaborated closely with UI/UX designers, project managers, and key stakeholders to gather and refine requirements, ensuring seamless integration of user-centric solutions.
- Designed and developed responsive, dynamic user interfaces with Vue and React, ensuring cross-platform compatibility and enhanced user experience.
- Built and optimized scalable .NET Core back-end services, following best practices for Microservices architecture and deploying to Azure App Service for seamless cloud-based operations.
- Implemented efficient inter-service communication through RabbitMQ, ensuring smooth data flow and real-time processing across microservices.
- Integrated Azure Media Services for efficient live video streaming, improving customer engagement through high-quality media delivery.
- Utilized Azure Cloud Storage to implement a robust auto-save functionality, enhancing user experience by ensuring data persistence and recovery.
- Developed an AI-powered chatbot for an e-commerce platform using Machine Learning, Deep Learning, and Natural Language Processing (NLP), increasing customer interaction and support efficiency.
- Established and maintained a continuous integration/continuous deployment (CI/CD) pipeline using Azure DevOps, incorporating NUnit for automated unit testing and Cypress for end-to-end testing, significantly improving development cycle speed and reducing deployment errors.
- Actively participated in Agile Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives, fostering a collaborative team environment.
- Led mentorship efforts, conducting regular code reviews and driving a culture of continuous learning and knowledge sharing within the development team.

Technical Skills & Technologies: Vue, React, Material UI, JavaScript, TypeScript, HTML5, CSS3 , .NET Core, C#, ASP.NET Core, Microservices Architecture, Azure App Service, Azure Media Services, Azure Cloud Storage, RabbitMQ, WebSockets, Cypress, NUnit, Azure DevOps, Git, Git Bash, PowerShell, Machine Learning, Deep Learning, Natural Language Processing (NLP), Agile Scrum, CI/CD, TDD, Code Review

Full Stack Developer

Gorilla Logic

08.2020 – 08.2022

- Designed and developed a scalable web application using Vue, React and .NET Core, driving a 30% increase in user engagement by optimizing UI and backend performance.
- Led the complete software development lifecycle, collaborating closely with stakeholders to define requirements, design solutions, and deploy features, all within an Agile framework.
- Integrated React Hooks in relevant components to effectively manage application lifecycle events, resulting in improved system stability and user experience.
- Optimized backend performance by refining database interactions with Entity Framework, reducing server load and ensuring faster query execution, which enhanced application responsiveness.
- Implemented SharePoint integration with ASP.NET to create a collaborative platform for document management, facilitating internal communication and improving team productivity.
- Designed and implemented a responsive UI using Chakra UI, ensuring seamless performance across modern browsers and devices, leading to a more consistent user experience.
- Enhanced the application's capabilities by adding real-time communication via SignalR and integrating key third-party APIs such as GoodRx, Stripe, Google Maps, and Twilio to extend functionality.
- Deployed applications in a cloud-native environment using Microsoft Azure services like App Service, Blob Storage, and Cosmos DB, ensuring scalability and security.
- Containerized microservices with Docker and orchestrated deployments with Kubernetes and Helm, improving deployment efficiency and scalability.
- Mentored junior developers, led code reviews, and fostered a culture of best practices to ensure high code quality and team collaboration.

Technical Skills & Technologies: Vue, React, React Hooks, Chakra UI, Redux, Vuex, JavaScript, TypeScript, HTML5, CSS3, SASS, .NET Core, ASP.NET, Entity Framework, RESTful APIs, Microservices Architecture, Microsoft Azure (App Service, Blob Storage, Cosmos DB), SignalR, WebSockets, Kafka, Cypress, Jest, Docker, Kubernetes, Helm, SharePoint, Stripe API, Google Maps API, Twilio API, Git, Git Bash, PowerShell, Agile Scrum, CI/CD, TDD, Code Review

Senior Web Developer

SophosSolution

02.2018 – 06.2020

- Built the development of a high-traffic e-commerce platform using Vue and React for the front-end and .NET Core for the back-end, adopting TDD practices, resulting in a 20% increase in user engagement.
- Integrated various third-party APIs, including payment gateways and accounting systems, ensuring seamless external service interactions and enhancing platform functionality.
- Architected and implemented a Microservices architecture using .NET Core, with AWS SQS enabling inter-service communication and GraphQL APIs optimizing data exchange between front-end and back-end.
- Developed real-time notification systems with AWS SNS and AWS Lambda, significantly improving user interaction and responsiveness within the application.
- Contributed to database design and optimization using MS SQL and Entity Framework, ensuring high data integrity, performance, and scalability for the e-commerce platform.
- Deployed and scaled an e-commerce platform featuring live video streaming, leveraging AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito for enhanced scalability and security.
- Implemented CI/CD pipelines using AWS CodePipeline, automating build, test, and deployment processes, which accelerated release cycles and minimized manual errors.
- Actively participated in Agile/Scrum practices, including sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of high-quality software and promoting team collaboration.

Technical Skills & Technologies: Vue, React, React Hooks, Chakra UI, Redux, JavaScript, TypeScript, HTML5, CSS3, SASS, .NET Core, ASP.NET, Entity Framework, RESTful APIs, Microservices Architecture, Microsoft Azure (App Service, Blob Storage, Cosmos DB), SignalR, WebSockets, Kafka, Cypress, Jest, Docker, Kubernetes, Helm, Agile Scrum, CI/CD, TDD

Web Developer

N-iX

09.2015 – 02.2018

- Built the development of a high-traffic e-commerce platform utilizing Vue for the front-end and .NET MVC, .NET Core for the back-end in a TDD environment, achieving a 20% increase in user engagement.
- Integrated multiple third-party APIs, including payment gateways and accounting systems, ensuring seamless integration with external services and improving business functionality.
- Architected and implemented a Microservices architecture using .NET Core, with AWS SQS for inter-service communication and GraphQL for optimized front-end and back-end data exchange.
- Developed a real-time notification system leveraging AWS SNS and Lambda, significantly improving application responsiveness and user engagement.
- Contributed to database design and optimization using MS SQL and Entity Framework, enhancing data integrity, system performance, and scalability for the e-commerce platform.
- Engineered live video streaming for the e-commerce platform using AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito, ensuring scalable and secure media delivery.
- Established CI/CD pipelines with AWS CodePipeline, automating build, test, and deployment processes, improving efficiency and accelerating release cycles.
- Actively engaged in Agile/Scrum practices, contributing to sprint planning, daily stand-ups, and retrospectives, ensuring timely and high-quality software delivery.

Technical Skills & Technologies: Vue, React.js, Next.js, Redux, JavaScript, TypeScript, HTML5, CSS3, SASS, SCSS, .NET Core, ASP.NET Core, WebAPI, GraphQL, Microservices Architecture, AWS (SQS, SNS, Lambda, IVS, DynamoDB, API Gateway, S3, EC2, Amplify, Cognito), MS SQL, MongoDB, Entity Framework, AWS SQS, WebSockets, Jest, Cypress, Mocha, AWS CodePipeline, Babel, Webpack, Git, Git Bash, PowerShell, Test-Driven Development (TDD), Agile Scrum, CI/CD

EDUCATION

Universidad Católica de Pereira

04.2011 – 09.2015

Bachelor of Computer Science

SKILLS

Languages:	JavaScript(ES6), Typescript, C++, HTML5, CSS3, PHP, Tailwind CSS
Frameworks and Libraries:	Vue, React.js, Next.js, Storybook, Material UI, Ant Design, Chakra UI, Redux, Vuex, React-Admin, .NET Core, .NET MVC, REST API, GraphQL, RabbitMQ, Kafka
Database Management System:	Firebase, MongoDB, AWS DynamoDB, MySQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Figma, Terraform, Docker, Kubernetes, Jenkins, Cypress, Jest, Jasmine, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, Google Cloud Computing (GCP)
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
