David Leandro Calvo Salazar

SENIOR SOFTWARE ENGINEER

+57 3017861606 • davidcalvopei@gmail.com • LinkedIn • Pereira, Risaralda, Colombia

SUMMARY

With over 10 years of hands-on experience in building scalable, high-performance web applications, I bring deep expertise in both front-end and back-end development. My core strengths lie in modern JavaScript frameworks such as Vue, Vuex, and React.js for front-end development, alongside robust back-end solutions built with Java Spring Boot, Spring Data JPA, and GraphQL. I have extensive experience in designing distributed systems and containerized microservices using Docker and Kubernetes, ensuring scalability, performance, and seamless integration across services. I am committed to delivering quality software through consistent adoption of Agile/Scrum practices and a strong focus on continuous delivery and CI/CD pipelines.

Adept at transforming complex requirements into actionable solutions, I thrive in collaborative environments, working closely with cross-functional teams and stakeholders to ensure timely and successful project delivery. I also have a proven track record of leading development efforts, mentoring junior developers, and conducting thorough code reviews to maintain high standards of code quality. Passionate about fostering a culture of clean, maintainable, and scalable code, I am dedicated to improving team performance, driving innovation, and continuously enhancing the development process.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

Rootstack

09.2022 – 07.2025

- Collaborated closely with UI/UX designers, project managers, and key stakeholders to gather and refine requirements, ensuring seamless integration of user-centric solutions that meet business objectives.
- Designed and developed responsive, dynamic user interfaces with Vue and React, ensuring cross-platform compatibility and providing an optimized user experience across devices.
- Engineered scalable back-end services using Java Spring Boot, applying best practices for Microservices architecture, and deploying solutions on Azure App Service to streamline cloud-based operations.
- Implemented efficient inter-service communication through RabbitMQ, ensuring seamless data flow and real-time processing across microservices, contributing to a more robust system architecture.
- Integrated Azure Media Services to deliver high-quality live video streaming, enhancing customer engagement and content accessibility in real-time.
- Utilized Azure Cloud Storage to implement an auto-save functionality, ensuring data persistence and easy recovery, improving user experience and reducing data loss risks.
- Developed an AI-powered chatbot for an e-commerce platform, leveraging Machine Learning, Deep Learning, and Natural Language Processing (NLP), resulting in enhanced customer interaction and streamlined support services.
- Established and maintained a comprehensive CI/CD pipeline using Azure DevOps, integrating unit testing (NUnit) and end-to-end testing (Cypress) to significantly enhance development speed and deployment accuracy.
- Actively contributed to Agile Scrum ceremonies, including sprint planning, daily stand-ups, and retrospectives, promoting a collaborative development culture and ensuring timely delivery of high-quality software.
- Led mentorship efforts, conducting regular code reviews and fostering a culture of continuous learning, knowledge sharing, and technical excellence within the development team.

Technical Skills & Technologies: Vue, React, Material UI, JavaScript, TypeScript, HTML5, CSS3, Java Spring Boot, Microservices Architecture, RESTful APIs, Spring Security, Spring Data JPA, Azure App Service, Azure Media Services, Azure Cloud Storage, RabbitMQ, WebSockets, Cypress, NUnit, Azure DevOps, Jenkins, Git, Git Bash, PowerShell, Machine Learning, Deep Learning, Natural Language Processing (NLP), Agile Scrum, CI/CD, TDD, Code Review

Full Stack Developer

Gorilla Logic

08.2020 – 08.2022

- Designed and developed a scalable web application using Vue, React and Java Spring Boot, driving a 30% increase in user engagement by optimizing both the user interface and backend performance.
- Led the complete software development lifecycle, collaborating with stakeholders to define requirements, design solutions, and deploy features, all within an Agile framework.
- Integrated Vue components to manage the application lifecycle efficiently, ensuring enhanced system stability and user experience.
- Optimized backend performance by refining database interactions, utilizing Spring Data JPA to reduce server load and ensure faster query execution, improving overall application responsiveness.
- Implemented integration with a third-party platform for document management, improving internal communication and team productivity.
- Designed and implemented a responsive UI using Material UI and Chakra UI, ensuring consistent performance across modern browsers and devices, leading to an enhanced user experience.
- Added real-time communication capabilities via WebSockets and integrated key third-party APIs such as Stripe, Google Maps, and Twilio, extending functionality and enriching the application.
- Deployed applications in a cloud-native environment using Microsoft Azure services, including App Service, Blob Storage, and Cosmos DB, ensuring both scalability and security.
- Containerized microservices with Docker and orchestrated deployments using Kubernetes and Helm, significantly improving deployment efficiency and scalability.
- Mentored junior developers, conducted regular code reviews, and fostered a culture of best practices, ensuring high-quality code and seamless team collaboration.

Technical Skills & Technologies: Vue, React, Material UI, Chakra UI, JavaScript, TypeScript, HTML5, CSS3, SASS, Java Spring Boot, Spring Data JPA, RESTful APIs, Microservices Architecture, Microsoft Azure (App Service, Blob Storage, Cosmos DB), WebSockets, Stripe API, Google Maps API, Twilio API, Docker, Kubernetes, Helm, Cypress, Jest, Git, Git Bash, PowerShell, CI/CD, TDD, Agile Scrum, Code Reviews

Senior Web Developer

SophosSolution

02.2018 – 06.2020

- Developed a high-traffic e-commerce platform using Vue for the front-end and Java Spring Boot for the back-end, adopting Test-Driven Development (TDD) practices, resulting in a 20% increase in user engagement.
- Integrated various third-party APIs, including payment gateways and accounting systems, ensuring seamless external service interactions and enhancing platform functionality.
- Architected and implemented a Microservices architecture using Java Spring Boot, with AWS SQS enabling inter-service communication and GraphQL APIs optimizing data exchange between front-end and back-end.
- Developed real-time notification systems with AWS SNS and AWS Lambda, significantly improving user interaction and responsiveness within the application.
- Contributed to database design and optimization using MS SQL and Spring Data JPA, ensuring high data integrity, performance, and scalability for the e-commerce platform.
- Deployed and scaled an e-commerce platform featuring live video streaming, leveraging AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito for enhanced scalability and security.
- Implemented CI/CD pipelines using AWS CodePipeline, automating build, test, and deployment processes, which accelerated release cycles and minimized manual errors.
- Actively participated in Agile/Scrum practices, including sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of high-quality software and promoting team collaboration.

Technical Skills & Technologies: Vue, Material UI, JavaScript, TypeScript, HTML5, CSS3, SASS, Java Spring Boot, Spring Data JPA, RESTful APIs, Microservices Architecture, GraphQL, AWS, AWS SQS, WebSockets, Cypress, Jest, AWS CodePipeline, CI/CD, TDD, Git, Git Bash, PowerShell, Agile Scrum, Code Reviews

Web Developer

N-iX

09.2015 – 02.2018

- Built a high-traffic e-commerce platform utilizing Vue for the front-end and Java Spring Boot for the back-end in a TDD environment, achieving a 20% increase in user engagement.
- Integrated multiple third-party APIs, including payment gateways and accounting systems, ensuring seamless integration with external services and enhancing business functionality.
- Architected and implemented a Microservices architecture using Java Spring Boot, with AWS SQS for inter-service communication and GraphQL for optimized front-end and back-end data exchange.
- Developed a real-time notification system leveraging AWS SNS and Lambda, significantly improving application responsiveness and user engagement.
- Contributed to database design and optimization using MS SQL and Spring Data JPA, enhancing data integrity, system performance, and scalability for the e-commerce platform.
- Engineered live video streaming for the e-commerce platform using AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito, ensuring scalable and secure media delivery.
- Established CI/CD pipelines with AWS CodePipeline, automating build, test, and deployment processes, improving efficiency and accelerating release cycles.
- Actively engaged in Agile/Scrum practices, contributing to sprint planning, daily stand-ups, and retrospectives, ensuring timely and high-quality software delivery.

Technical Skills & Technologies: Vue, Material UI, JavaScript, TypeScript, HTML5, CSS3, SASS, SCSS, Java Spring Boot, Spring Data JPA, RESTful APIs, Microservices Architecture, GraphQL, AWS (SNS, Lambda, IVS, DynamoDB, API Gateway, S3, EC2, Amplify, Cognito), MS SQL, MongoDB, AWS SQS, WebSockets, Jest, Cypress, Mocha, AWS CodePipeline, CI/CD, TDD, Git, Git Bash, PowerShell, Agile Scrum, Code Reviews

EDUCATION

Universidad Católica de Pereira

04.2011 – 09.2015

Bachelor of Computer Science

SKILLS

Languages:	JavaScript(ES6), Typescript, C++, HTML5, CSS3, PHP, Tailwind CSS
Frameworks and Libraries:	Vue, React.js, Next.js, Storybook, Material UI, Ant Design, Chakra UI, Vuex, React-Admin, Java Spring Boot, Spring Data JPA, REST API, GraphQL, RabbitMQ, Kafka
Database Management System:	Firebase, MongoDB, AWS DynamoDB, MySQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Figma, Terraform, Docker, Kubernetes, Jenkins, Cypress, Jest, Jasmine, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, Google Cloud Computing (GCP)
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
