Ernesto Gama Jimenez

Senior Full-Stack Developer

ernesto.gama.jimenez@gmail.com +57 323 462 1392 Pereira, Risaralda, Colombia

SUMMARY

Senior Full Stack Engineer with 10+ years of experience building scalable, high-performance web applications. Skilled in Angular, .NET, SQL, NoSQL, and Cloud infrastructure, with a strong focus on clean architecture, code quality, and DevOps best practices. Proven record of accomplishment working in agile teams, mentoring developers, and delivering end-to-end features across Microservices and serverless architectures. Combines deep technical expertise with a collaborative mindset, ensuring alignment between technical solutions and business objectives. Experienced in optimizing workflows, enforcing coding standards, and driving continuous delivery in cloud-native environments.

TECHNOLOGY SUMMARY

Languages:	JavaScript(ES6), Typescript, Python, C#, HTML5, CSS3, PHP, Java
Frameworks and Libraries:	Angular, RxJs, React.js, Next.js, .NET, .Net Core, .NET MVC, Redux, Blazor, MAUI, REST API, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM
Database Management System:	MySQL, MongoDB, AWS DynamoDB, AWS RDS, MS SQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Terraform, Docker, Kubernetes, Jenkins, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	Microsoft Azure, AWS Cloud Services, GCP
Testing	Cypress, Jest, Jasmin, Mocha
Methodologies:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts

LANGUAGE

English: Bilingual

Spanish: Native

EDUCATION

Bachelor's Degree in Computer Science

Universidad de las Américas Puebla

04.2009-09.2014

PROFESSIONAL EXPERIENCE

Rootstack

Senior Software Engineer

09.2023 – 06.2025

Main achievements and responsibilities:

- Took part in frontend development process, designing and implementing **Angular** 17 and 18 with efficient state management using **Redux Toolkit** and **Context API**.
- Developed responsive and dynamic user interfaces, ensuring seamless user experience and cross-platform compatibility using **Angular**, **NgRx** and **RxJS**.
- Developed **RESTful APIs** and **Microservices** using **.NET Core (Web API, Blazor, MAUI)** and **Java** (**Spring Boot**, **Quarkus**) for high-performance backend systems.
- Built intelligent Chatbot with **LLMs** (GPT, Claude, and Mistral), LangChain, and **Azure AI**, enabling NLP-powered conversational assistants for enterprise applications.
- Engineered real-time processing solutions with **WebSockets**, **Kafka**, and **Redis** for interactive and scalable applications.
- Designed and built scalable full-stack applications with **.NET** and **Spring Boot** on the backend and **React**/**Angular** on the frontend with **GraphQL**.
- Integrated **PostgreSQL**, **MSSQL**, and **MongoDB**, optimizing database performance for large-scale applications.
- Implemented secure authentication and authorization mechanisms using **JWT**, **OAuth**, and **Keycloak**.
- Optimized backend performance by refactoring APIs, implementing asynchronous programming, caching mechanisms (**Redis**), and database indexing.
- Developed AI-driven anomaly detection systems for predictive security analysis.
- Deployed scalable applications on **Microsoft Azure**, managing infrastructure with **Docker**, **Kubernetes**, and CI/CD pipelines (**Jenkins**, **GitHub Actions**).

Used languages and technologies: Angular, RxJS, Redux, MaterialUI, Cypress, Jest, .Net Core, Node.js, Express, Nest.js, Java, Spring Boot, WebSocket, Kafka, Keycloak, Jenkins, MongoDB, AWS Amplify, AWS Cognito, AWS Lambda, AWS AppSync, AWS API Gateway, AWS EC2, AWS S3, AWS IVS, AWS CloudWatch, RabbitMQ, AI, Machine Learning, Depth Learning, Natural Language Processing (NLP), Git Bash, PowerShell

Teleperformance

Senior Web Developer

10.2021 – 08.2023

Main achievements and responsibilities:

- Developed an automatic restaurant ordering system, meticulously designing the **MSSQL** database and employing **.NET Core MVC** and **Angular** 13 for backend development, resulting in a 70% increase in guest satisfaction.
- Strategically integrated backend systems using **.NET Web API** with table-installed order buttons, ensuring real-time synchronization and achieving a seamless dining experience for customers, which led to a 15% decrease in order turnaround time in the financial industry.
- Designed and implemented automation workflows using **StackStorm**, streamlining IT operations and improving system efficiency through event-driven orchestration and integration with diverse tools and platforms.
- Utilized **React** (**Redux**) to craft a user-friendly front-end interface, providing restaurant managers with intuitive controls for overseeing operations, ultimately leading to a 30% improvement in overall managerial efficiency.
- Used **Azure SQL Database** to store product information, orders, and user data; also used **Azure Blob Storage** for Microservices.
- Created an efficient API-based email system, reducing data dissemination time by 30% and enhancing decision-making and communication.

Used languages and technologies: Angular, Chakra UI, React, Redux, Cypress, Jest, .NET Core, .Net Web API, Node.js, Express, MySQL, PostgreSQL, Azure CosmosDB, StackStorm, Git Bash, AWS, PowerShell, Ably, Kafka

Tech Mahindra

Senior Web Developer

11.2019 – 10.2021

Main achievements and responsibilities:

- Built front end UI and components using **Angular** latest versions.
- Built custom components for UX-Library consisting Accordion, Filters, Dropdown, Carousel, Button, Checkbox, Input, Icons.
- Developed custom API layer using **.NET Core Web API** to handle all CRUD transactions, **JWT** token management and implemented interceptors to embed custom headers.
- Implemented **TDD** using **NUnit** framework for backend and Jest for frontend with **Enzyme** test utilities.
- Implemented CSS Box Model, styled web pages using CSS pre-processor **SASS**, and effectively used mixins, functions, custom grid systems, grid-area concepts and flexbox for fluid-responsive application.
- Expertise usage of **GitLab** and **JIRA** as version control and tracking units.
- Implemented real-time notification using **Azure Notification Hubs** and **Azure Functions**, enhancing the overall interactivity and responsiveness of the applications.
- Contributed to database design and optimization, employing **Azure SQL / RDS PostgreSQL** to ensure data integrity, scalability, and retrieval efficiency.
- Actively participated in **Agile** development methodologies, consistently meeting project deadlines and ensuring the successful delivery of high-quality software solutions.

Used languages and technologies: JavaScript, Typescript, Angular, RxJs, React, Next.js, SASS, **.**NET Core Web API, Node.js, MongoDB, GitLab, PostgreSQL, AWS DynamoDB, AWS RDS, GraphQL, AWS, Azure cloud services, Jest,

Vydr.io

Web Developer

06.2016 – 11.2019

- Proficiently built websites adhering to Web 2.0 standards using HTML5, CSS3, ECMAScript, SASS, JavaScript, **Backbone**, and **AngularJS**.
- Performed best practices in implementing **AngularJS** (1.x, 2.0, 4.0) modules and creating free-standing, reusable, and testable components.
- Exclusively used **.NET Core** for building fast and scalable backend services and **ASP.NET MVC** as a server framework.
- Adopted NPM, Gulp & Grunt as task managers and integrated database, API, caching layer, proxies, and web services in development workflows.
- Worked closely with backend team to ensure smooth deployments by configuring different builds and test scripts for CI/CD pipelines.
- Developed complex stored procedures using temporary tables and loops with **T-SQL / PL-SQL** on **MSSQL**.
- Used **Google Analytics** to capture user metrics and improve customer experience with digital analytics.
- Optimized website load time by 35% through frontend optimization techniques including code minification, image compression, and CSS sprites—boosting SEO to top 5 Google rankings.

Used languages and technologies: JavaScript, Typescript, Angular, AngularJS, WebSocket, RxJs, Next.js, SASS, .NET MVC Node.js, MongoDB, Gulp, AWS DynamoDB, AWS RDS, GraphQL, AWS, Azure cloud services, Jest, Mocha, SCSS, SASS, Babel, Webpack, Git Bash, PowerShell
