Ernesto Gama Jimenez

Senior Full-Stack Developer

ernesto.gama.jimenez@gmail.com +57 323 462 1392 Pereira, Risaralda, Colombia

SUMMARY

Senior Full Stack Engineer with over 10 years of experience architecting and delivering scalable, high-performance web applications. Proficient in developing robust frontend and backend systems using Angular, Java Spring Boot, SQL/NoSQL databases, and cloud platforms including AWS and Azure. Skilled in applying clean architecture principles, enforcing code quality standards, and leading DevOps practices such as CI/CD, infrastructure as code, and containerization.

Proven track record of success in Agile/Scrum environments, mentoring engineering teams, and delivering full-stack solutions across microservices and serverless architectures. Adept at bridging technical execution with business objectives by streamlining development workflows, optimizing deployment pipelines, and aligning architecture with product goals. Passionate about building performant, secure, and maintainable systems that scale with business growth.

TECHNOLOGY SUMMARY

Languages:	JavaScript(ES6), Typescript, Python, C#, HTML5, CSS3, PHP, Java
Frameworks and Libraries:	Angular, RxJs, React.js, Next.js, Java Spring Boot, JPA, .NET, .Net Core, Redux, Blazor, MAUI, REST API, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM,
Database Management System:	MySQL, MongoDB, AWS DynamoDB, AWS RDS, MS SQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Terraform, Docker, Kubernetes, Jenkins, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	Microsoft Azure, AWS Cloud Services, GCP
Testing	Cypress, Jest, Jasmin, Mocha
Methodologies:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts

LANGUAGE

English: Bilingual

Spanish: Native

EDUCATION

Bachelor's Degree in Computer Science

Universidad de las Américas Puebla

04.2009-09.2014

PROFESSIONAL EXPERIENCE

Rootstack

Senior Software Engineer

09.2023 – 06.2025

Main achievements and responsibilities:

- Participated in the development of modern, scalable front-end applications using Angular (v15+), leveraging RxJS, NgRx, and Component-based architecture to ensure maintainability and high performance.
- Designed responsive and dynamic UIs with Angular Material and custom SCSS theming, ensuring seamless user experience across devices and browsers.
- Built modular and efficient RESTful APIs and microservices using Java Spring Boot, adhering to clean architecture principles and performance optimization strategies.
- Developed and integrated NLP-powered conversational chatbots using LangChain, Azure AI Services, and LLMs such as GPT, Claude, and Mistral, streamlining enterprise communication workflows.
- Engineered real-time event-driven systems utilizing WebSockets, Apache Kafka, and Redis, enhancing interactivity and system scalability.
- Delivered end-to-end full-stack applications with Angular on the frontend and Spring Boot on the backend, incorporating both REST and GraphQL APIs for flexible, client-driven data access.
- Managed PostgreSQL, MongoDB, and Microsoft SQL Server databases, implementing indexing strategies and optimized schemas to support high-volume transactions.
- Ensured secure user authentication and authorization via JWT, OAuth2, and Keycloak, supporting RBAC and enterprise-level compliance requirements.
- Built AI-powered anomaly detection systems enabling predictive analytics and proactive monitoring in security-critical environments.
- Deployed and orchestrated cloud-native applications on Microsoft Azure, leveraging Docker, Kubernetes, and CI/CD pipelines with GitHub Actions and Jenkins for automated builds, tests, and deployments.

Tech Stack: Angular, RxJS, NgRx, Angular Material, SCSS, TypeScript, Java, Spring Boot, REST API, GraphQL, WebSockets, Apache Kafka, Redis, PostgreSQL, MongoDB, Microsoft SQL Server, JWT, OAuth2, Keycloak, Docker, Kubernetes, Jenkins, GitHub Actions, Microsoft Azure, Azure AI, LangChain, GPT, Claude, Mistral, AI/ML/NLP, Cypress, Jest, Git Bash, PowerShell

Teleperformance

Senior Web Developer

10.2021 – 08.2023

Main achievements and responsibilities:

- Architected and developed an automated restaurant ordering platform, designing the database with Azure SQL and implementing backend services using Java Spring Boot, resulting in a 70% increase in guest satisfaction through faster, more accurate service delivery.
- Integrated backend systems with table-installed hardware order buttons, using REST APIs and WebSocket events for real-time synchronization, which led to a 15% reduction in order turnaround time in high-traffic environments.
- Engineered event-driven automation workflows with StackStorm, automating IT operations by connecting internal microservices with external tools, significantly reducing manual intervention and improving operational reliability.
- Developed a responsive restaurant management dashboard using Angular, NgRx, and Chakra UI, enabling managers to monitor orders, inventory, and analytics efficiently, achieving a 30% improvement in operational oversight.
- Utilized Azure Blob Storage to manage media files and inter-service file exchanges, while storing structured application data (menu, users, transactions) in Azure SQL Database for scalability and reliability.
- Implemented a robust, API-driven email notification system to alert managers and staff of real-time updates and reports, reducing decision latency by 30% and improving communication efficiency across departments.

Tech Stack: Angular, TypeScript, NgRx, Chakra UI, Java, Spring Boot, REST API, WebSockets, Azure SQL Database, Azure Blob Storage, PostgreSQL, MySQL, StackStorm, Apache Kafka, Ably, Cypress, Jest, Git, Git Bash, PowerShell, AWS, Microsoft Azure

Tech Mahindra

Senior Web Developer

11.2019 – 10.2021

Main achievements and responsibilities:

- Developed enterprise-grade front-end user interfaces using Angular with TypeScript, emphasizing reusability, accessibility (WCAG compliance), and responsive design to ensure optimal performance across devices.
- Engineered a custom UI component library featuring dynamic elements such as Accordions, Filters, Dropdowns, Carousels, Buttons, Checkboxes, Inputs, and Icon systems—boosting development speed and visual consistency across product teams.
- Built a secure and scalable backend API layer using Java Spring Boot, implementing complete CRUD operations, JWT-based authentication, and custom interceptors for secure and centralized request/response handling.
- Practiced Test-Driven Development (TDD) using JUnit and Mockito for unit testing backend logic, while applying Jest and Angular Testing Library for frontend coverage—resulting in robust, regression-free releases.
- Crafted modern, responsive layouts using SASS, the CSS Box Model, custom mixins, and both Flexbox and CSS Grid, delivering fluid design systems optimized for accessibility and maintainability.
- Used GitLab for source control and JIRA for agile tracking and sprint planning, collaborating with cross-functional teams in a Scrum-based environment to meet critical delivery milestones.
- Implemented real-time notification capabilities through Azure Functions and Azure Notification Hubs, significantly enhancing user engagement and system interactivity.
- Designed and optimized relational database schemas, leveraging Azure SQL and Amazon RDS (PostgreSQL) for high-performance, scalable, and secure data management across distributed services.
- Participated in daily standups, sprint planning, and retrospectives, consistently contributing to backlog refinement and on-time feature releases in an Agile ecosystem.

Tech Stack: Angular, TypeScript, NgRx, Java, Spring Boot, REST API, GraphQL, JWT, Azure Functions, Azure Notification Hubs, PostgreSQL, Azure SQL, AWS RDS, DynamoDB, MongoDB, SASS, Flexbox, CSS Grid, GitLab, JIRA, Jest, Angular Testing Library, JUnit, Mockito, AWS, Microsoft Azure

Vydr.io

Web Developer

Main achievements and responsibilities:

- Designed and developed modern, responsive web applications in compliance with Web 2.0 standards using Angular, TypeScript, HTML5, CSS3, and SASS, ensuring accessibility, responsiveness, and pixel-perfect UI delivery.
- Built modular, testable, and reusable Angular components, applying best practices with RxJS, Observables, Services, and Angular Forms, while implementing state management with NgRx for scalable application architecture.
- Engineered robust backend services using Java Spring Boot, creating secure and scalable RESTful APIs, integrating JWT-based authentication, and adhering to clean architecture principles for maintainability and performance.
- Streamlined development workflows using Webpack, Babel, and NPM, while automating repetitive tasks and deployment scripts with Gulp and Grunt.
- Collaborated with DevOps and backend teams to implement efficient CI/CD pipelines via GitHub Actions and GitLab CI, accelerating release cycles and improving deployment reliability.
- Optimized database performance by developing advanced stored procedures and query logic using T-SQL and PL/SQL across MS SQL Server and PostgreSQL, improving query efficiency in high-transaction environments.
- Integrated Google Analytics and custom event tracking to analyze user engagement, enhance UX strategies, and support data-driven decision-making for feature prioritization.
- Improved application performance by 35% through advanced frontend optimization techniques including code splitting, lazy loading, image compression, minification, and CSS sprites, contributing to top-5 Google SEO rankings.

Tech Stack: Angular, TypeScript, NgRx, Java, Spring Boot, REST API, GraphQL, HTML5, CSS3, SASS, SCSS, RxJS, WebSocket, PostgreSQL, MSSQL, MongoDB, AWS (RDS, DynamoDB, S3), Azure (Functions, App Services), Babel, Webpack, Gulp, Grunt, Git, GitHub Actions, GitLab CI, Jest, Mocha, Google Analytics, CI/CD, T-SQL, PL/SQL, Git Bash, PowerShell
