Ernesto Gama Jimenez

Senior Full-Stack Developer

ernesto.gama.jimenez@gmail.com +57 323 462 1392 Pereira, Risaralda, Colombia

SUMMARY

Senior Full Stack Engineer with 10+ years of experience building scalable, high-performance web applications. Skilled in Angular, Node.js, SQL, NoSQL, and Cloud infrastructure, with a strong focus on clean architecture, code quality, and DevOps best practices. Proven record of accomplishment working in agile teams, mentoring developers, and delivering end-to-end features across Microservices and serverless architectures. Combines deep technical expertise with a collaborative mindset, ensuring alignment between technical solutions and business objectives. Experienced in optimizing workflows, enforcing coding standards, and driving continuous delivery in cloud-native environments.

TECHNOLOGY SUMMARY

Languages:	JavaScript(ES6), Typescript, Python, C++, HTML5, CSS3, PHP, Java
Frameworks and Libraries:	Angular, RxJs, React.js, Next.js, Node.js, Nest.js, Express, React Native, Redux, Java, Spring Boot, REST API, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM
Database Management System:	MySQL, MongoDB, AWS DynamoDB, AWS RDS, MS SQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Terraform, Docker, Kubernetes, Jenkins, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Testing	Cypress, Jest, Jasmin, Mocha
Methodologies:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts

LANGUAGE

English: Bilingual

Spanish: Native

EDUCATION

Bachelor's Degree in Computer Science

Universidad de las Américas Puebla

04.2009-09.2014

PROFESSIONAL EXPERIENCE

Rootstack

Senior Software Engineer

09.2023 – 06.2025

Main achievements and responsibilities:

- Took part in frontend development process, designing and implementing Angular 17 and 18 with efficient state management using Redux Toolkit and Context API.
- Developed responsive and dynamic user interfaces, ensuring seamless user experience and cross-platform compatibility using Angular, NgRx and RxJS.
- Developed RESTful APIs and Microservices using Node (Express, Nest) and Java (Spring Boot, Quarkus) for high-performance backend systems.
- Built intelligent Chatbot with LLMs (GPT, Claude, and Mistral), LangChain, and Azure AI, enabling NLP-powered conversational assistants for enterprise applications.
- Engineered real-time processing solutions with WebSockets, Kafka, and Redis for interactive and scalable applications. Designed and built scalable full-stack applications with Node, Nest, and Spring Boot on the backend and React/Angular on the frontend with GraphQL.
- Integrated PostgreSQL, MySQL, and MongoDB, optimizing database performance for large-scale applications.
- Implemented secure authentication and authorization mechanisms using JWT, OAuth, and Keycloak. Developed enterprise-grade applications in finance, healthcare, and AI-driven analytics industries.
- Optimized backend performance by refactoring APIs, implementing asynchronous programming, caching mechanisms (Redis), and database indexing. Developed AI-driven anomaly detection systems for predictive security analysis.
- Deployed scalable applications on AWS and Azure, managing infrastructure with Docker, Kubernetes, and CI/CD pipelines (Jenkins, GitHub Actions).

Used languages and technologies: Angular, RxJS, Redux, MaterialUI, Cypress, Jest, Node.js, Express, Nest.js, Java, Spring Boot, WebSocket, Kafka, Keycloak, Jenkins, MongoDB, AWS Amplify, AWS Cognito, AWS Lambda, AWS AppSync, AWS API Gateway, AWS EC2, AWS S3, AWS IVS, AWS CloudWatch, RabbitMQ, AI, Machine Learning, Depth Learning, Natural Language Processing (NLP), Git Bash, PowerShell

Teleperformance

Senior Web Developer

10.2021 – 08.2023

Main achievements and responsibilities:

- Developed an automatic restaurant ordering system, meticulously designing the MySQL database and employing Node.js and Angular 13 for backend development, resulting in a 70% increase in guest satisfaction.
- Strategically integrated backend systems using Node Express with table-installed order buttons, ensuring real-time synchronization and achieving a seamless dining experience for customers, which led to a 15% decrease in order turnaround time in financial industry.
- Designed and implemented automation workflows using StackStorm, streamlining IT operations and improving system efficiency through event driven orchestration and integration with diverse tools and platforms
- Utilized React (Redux) to craft a user-friendly front-end interface, providing restaurant managers with intuitive controls for overseeing operations, ultimately leading to a 30% improvement in overall managerial efficiency.
- Used AWS RDS database instance (MySQL or PostgreSQL) to store product information, orders, and user data, also used AWS S3 bucket for Microservices.
- Created an efficient API-based email system, reducing data dissemination time by 30% and enhancing decision-making and communication.

Used languages and technologies: Angular, Chakra UI, React, Redux, Cypress, Jest, Node.js, Express, MySQL, PostgreSQL, Azure CosmosDB, StackStorm, Git Bash, AWS, PowerShell, Ably, Kafka

Tech Mahindra

Senior Web Developer

11.2019 – 10.2021

Main achievements and responsibilities:

- Built front end UI and components using Angular latest versions.
- Built custom components for UX-Library consisting Accordion, Filters, Dropdown, Carousel, Button, Checkbox, Input, Icons.
- Developed custom API layer to handle all CRUD transactions, JWT token management and implemented interceptors to embed custom headers.
- Implemented TDD using JEST framework for React along with Enzyme test utilities.
- Implemented CSS Box Model, styled web pages using CSS pre-processor SASS, and effectively used mixins, functions, custom grid systems, grid-area concepts and flexbox for fluid-responsive application.
- Expertise usage of GitLab and JIRA as version control and tracking this units
- Implemented real-time notification using AWS SNS and Lambda, enhancing the overall interactivity and responsiveness of the applications.
- Contributed to database design and optimization, employing AWS RDS (PostgreSQL) database to ensure data integrity, scalability, and retrieval efficiency.
- Actively participated in Agile development methodologies, consistently meeting project deadlines and ensuring the successful delivery of high-quality software solutions.

Used languages and technologies: JavaScript, Typescript, Angular, RxJs, React, Next.js, SASS, Node.js, MongoDB, GitLab, PostgreSQL, AWS DynamoDB, AWS RDS, GraphQL, AWS, Azure cloud services, Jest,

Vydr.io

Web Developer

06.2016 – 11.2019

- Proficiently built Website, which adheres to Web 2.0 Industry Standards Using HTML5, CSS3, ECMAScript, SASS, JavaScript, backbone, AngularJS.
- Performed best practices in implementing AngularJS (1.x, 2.0, 4.0) modules and creating free-standing, reusable, and testable components
- Exclusively used Node.js for building fast and scalable network applications and Express.JS as standard server framework for Node.js.
- Adopted NPM, Gulp & Grunt as Task Managers and performed, database, API, caching layer, proxies, and other web services used in the process
- Worked closely with Backend Team to ensure smooth deployments by configuring different builds and test scripts for CI-CD process laid.
- Developed complex stored procedures using temporary tables and loops using SQL and PL/SQL.
- Used Google Analytics to capture User metrics to improve Customer Experience with Digital Analytics
- Optimized website load time by 35% using frontend optimization techniques such as code minification, image optimization, and CSS sprites, and improve SEO ranking, making it to the top 5 Google search results.

Used languages and technologies: JavaScript, Typescript, Angular, AngularJS, WebSocket, RxJs, Next.js, SASS, Node.js, MongoDB, Gulp, AWS DynamoDB, AWS RDS, GraphQL, AWS, Azure cloud services, Jest, Mocha, SCSS, SASS, Babel, Webpack, Git Bash, PowerShell
