Ernesto Gama Jimenez

Senior Full-Stack Developer

ernesto.gama.jimenez@gmail.com +57 323 462 1392 Pereira, Risaralda, Colombia

SUMMARY

Senior Full Stack Engineer with over 10 years of experience designing and delivering scalable, high-performance web applications. Proficient in building robust frontend and backend systems using React.js, Java Spring Boot, SQL/NoSQL, and cloud platforms such as AWS and Azure. Adept at applying clean architecture principles, enforcing code quality standards, and leading DevOps practices including CI/CD, infrastructure as code, and containerization.Demonstrated success working in Agile/Scrum teams, mentoring developers, and delivering full-stack solutions across microservices and serverless architectures. Known for bridging the gap between technical execution and business goals by optimizing development workflows, streamlining deployment pipelines, and aligning architecture with product vision. Passionate about building performant, maintainable, and secure systems that scale.

TECHNOLOGY SUMMARY

Languages:	JavaScript(ES6) , Java, Typescript, Python, C#, HTML5, CSS3, PHP
Frameworks and Libraries:	React.js, Next.js, Java SpringBoot, .NET MVC, .NET Core, Redux, Blazor, MAUI, REST API, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM
Database Management System:	MySQL, MongoDB, AWS DynamoDB, AWS RDS, MS SQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Terraform, Docker, Kubernetes, Jenkins, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	Microsoft Azure, AWS Cloud Services, GCP
Testing	Cypress, Jest, Jasmin, Mocha
Methodologies:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts

LANGUAGE

English: Bilingual

Spanish: Native

EDUCATION

Bachelor's Degree in Computer Science

Universidad de las Américas Puebla

04.2009-09.2014

PROFESSIONAL EXPERIENCE

Rootstack

Senior Software Engineer

09.2023 – 06.2025

Main achievements and responsibilities:

- Participated in the development of modern front-end interfaces using React.js (Hooks, Context API), with efficient state management via Redux Toolkit, ensuring maintainable and scalable UI architecture.
- Built responsive and dynamic user interfaces, ensuring consistent cross-platform compatibility using React.js, Material UI, and React Router.
- Designed and developed RESTful APIs and microservices using Java Spring Boot, focusing on modular, high-performance backend systems.
- Implemented intelligent NLP-powered chatbots using LLMs (GPT, Claude, Mistral), LangChain, and Azure AI Services, integrating seamlessly into enterprise applications.
- Engineered real-time event-driven systems using WebSockets, Apache Kafka, and Redis to support interactive user experiences and scalable application flows.
- Delivered scalable, full-stack web applications using React.js on the frontend and Java Spring Boot on the backend, integrating both REST and GraphQL APIs for flexible data operations.
- Integrated and optimized PostgreSQL, MongoDB, and Microsoft SQL Server databases, leveraging indexing strategies and schema optimization for performance at scale.
- Secured applications using modern authentication and authorization protocols, including JWT, OAuth2, and Keycloak, ensuring compliance and role-based access control.
- Enhanced backend efficiency by refactoring APIs, implementing asynchronous processing, caching layers (Redis), and database tuning to reduce response times and increase throughput.
- Developed AI-powered anomaly detection systems to enable predictive analytics and proactive security monitoring across enterprise systems.
- Deployed and managed cloud-native applications on Microsoft Azure, utilizing Docker, Kubernetes, and CI/CD pipelines via GitHub Actions and Jenkins for automated testing and delivery.

Tech Stack: React.js, Redux Toolkit, React Router, Material UI, TypeScript, Java, Spring Boot, REST API, GraphQL, WebSockets, Apache Kafka, Redis, PostgreSQL, MongoDB, Microsoft SQL Server, JWT, OAuth2, Keycloak, Docker, Kubernetes, Jenkins, GitHub Actions, Microsoft Azure, Azure AI, LangChain, GPT, Claude, Mistral, AI/ML/NLP, Cypress, Jest, Git Bash, PowerShell

Teleperformance

Senior Web Developer

10.2021 – 08.2023

Main achievements and responsibilities:

- Designed and developed an automated restaurant ordering system, architecting the database with Azure SQL and building backend services using Java Spring Boot, resulting in a 70% increase in guest satisfaction through faster and more accurate service delivery.
- Integrated backend systems with hardware order buttons installed at tables, enabling real-time synchronization of orders via REST APIs and WebSocket events, leading to a 15% reduction in order turnaround time within a high-volume service environment.
- Created event-driven automation workflows using StackStorm, streamlining IT operations by integrating with third-party tools, services, and microservices to reduce manual interventions and enhance system efficiency.
- Built a responsive and intuitive restaurant management interface using React.js with Redux Toolkit, empowering managers to oversee orders, inventory, and analytics with ease, resulting in a 30% improvement in operational oversight.
- Leveraged Azure SQL Database for structured data storage (menu, users, transactions), and used Azure Blob Storage for managing media assets and microservice file exchanges.
- Implemented an API-driven email notification system for critical updates and reporting, reducing data dissemination time by 30%, and supporting faster decision-making across operational teams.

Tech Stack:

React.js, Redux Toolkit, TypeScript, Chakra UI, Java, Spring Boot, REST API, WebSockets, Azure SQL Database, Azure Blob Storage, PostgreSQL, MySQL, StackStorm, Kafka, Ably, Cypress, Jest, Git, Git Bash, PowerShell, AWS, Microsoft Azure

Tech Mahindra

Senior Web Developer

11.2019 – 10.2021

Main achievements and responsibilities:

- Developed front-end user interfaces using React.js with TypeScript, focusing on reusable, accessible, and responsive components for enterprise-grade applications.
- Created a custom component library including interactive UI elements such as Accordions, Filters, Dropdowns, Carousels, Buttons, Checkboxes, Inputs, and Icon sets, enabling design consistency and rapid development.
- Built a secure and scalable API layer using Java Spring Boot, implementing full CRUD functionality, JWT-based authentication, and interceptors for custom header management and middleware logic.
- Employed Test-Driven Development (TDD) using JUnit and Mockito for backend unit testing, and Jest with React Testing Library for frontend testing, ensuring maintainability and minimizing regression issues.
- Applied modern CSS architecture using SASS, leveraging the CSS Box Model, custom mixins, functions, Flexbox, and CSS Grid to deliver a fluid, responsive layout across devices.
- Utilized GitLab for version control and JIRA for sprint planning and issue tracking in a fully Agile environment.
- Integrated real-time notification systems using Azure Functions and Azure Notification Hubs, enhancing user engagement and responsiveness across the app.
- Worked in Agile Scrum teams, actively participating in sprint planning, daily standups, and retrospectives to ensure high-quality, on-time feature delivery.

Tech Stack:

React.js, Redux Toolkit, TypeScript, Java, Spring Boot, REST API, GraphQL, JWT, Azure Functions, Azure Notification Hubs, PostgreSQL, Azure SQL, AWS RDS, DynamoDB, MongoDB, SASS, Flexbox, CSS Grid, GitLab, JIRA, Jest, React Testing Library, JUnit, Mockito, AWS, Azure

Vydr.io

Web Developer

Main achievements and responsibilities:

- Designed and developed modern, responsive web applications following Web 2.0 standards, using React.js, TypeScript, HTML5, CSS3, SASS, and modern JavaScript (ES6+).
- Built modular, testable, and reusable React components, adopting best practices in functional component design, hooks, and context-based state management.
- Engineered scalable backend services using Java Spring Boot, building RESTful APIs, integrating security via JWT, and structuring clean architecture for performance and maintainability.
- Used Webpack, Babel, and NPM to manage builds and development workflows; automated repetitive tasks and deployment processes using Gulp and Grunt.
- Collaborated closely with backend engineers to streamline deployment processes using CI/CD pipelines (GitLab CI, GitHub Actions), improving release reliability and frequency.
- Optimized complex database operations using advanced T-SQL and PL/SQL, developing stored procedures, loops, and temp tables on MS SQL Server and PostgreSQL.
- Applied advanced frontend performance techniques—code splitting, lazy loading, asset optimization (image compression, minification, CSS sprites)—which resulted in a 35% faster load time and top-5 Google SEO rankings.

Tech Stack:

React.js, Redux, TypeScript, Java, Spring Boot, REST API, GraphQL, HTML5, CSS3, SASS, SCSS, WebSocket, PostgreSQL, MSSQL, MongoDB, AWS (RDS, DynamoDB, S3), Azure (Functions, App Services), Babel, Webpack, Gulp, Grunt, Git, GitHub Actions, Jest, Mocha, Google Analytics, CI/CD, T-SQL, PL/SQL, Git Bash, PowerShell
