Ernesto Gama Jimenez

Senior Full-Stack Developer

ernesto.gama.jimenez@gmail.com +57 323 462 1392 Pereira, Risaralda, Colombia

SUMMARY

Senior Full-Stack Engineer with 10+ years of experience designing and delivering scalable, high-performance web applications. Expert in React.js, Node.js, Python, RESTful APIs, and cloud-native architectures (AWS, Azure). Skilled in SQL/NoSQL databases, microservices, and serverless solutions, with a strong focus on clean architecture, code quality, and DevOps best practices. Proven track record in agile environments, leading end-to-end feature development, mentoring developers, and driving CI/CD adoption. Adept at integrating AI/ML solutions, optimizing workflows, and aligning technical strategies with business objectives to deliver measurable impact.

TECHNOLOGY SUMMARY

Languages:	JavaScript(ES6), Typescript, Python, C++, HTML5, CSS3, PHP
Frameworks and Libraries:	React.js, Angular, Next.js, Gatsby, Node.js, Express, NestJS, React Native, Redux, RxJs, Django, Flask, FastAPI, REST API,GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM
Database Management System:	MySQL, MongoDB, AWS DynamoDB, AWS RDS, MS SQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Terraform, Docker, Kubernetes, Jenkins, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Testing	Cypress, Jest, Jasmin, Mocha
Methodologies:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts

LANGUAGE

English: Bilingual

Spanish: Native

PROFESSIONAL EXPERIENCE

Rootstack

Senior Software Engineer

09.2023 – 06.2025

Main achievements and responsibilities:

- Collaborated with UI/UX designers, product managers, and stakeholders to refine requirements and ensure alignment with business goals.
- Designed and optimized scalable front-end applications using React.js (micro-frontend architecture on AWS Amplify), improving performance and user experience.
- Developed RESTful APIs and backend services with Node.js and Python, integrating MongoDB and GraphQL to handle complex data operations and reduce query execution time by 30%.
- Built and deployed microservices on AWS ECS with RabbitMQ for inter-service communication, improving scalability and system reliability.
- Implemented serverless solutions using AWS Lambda, API Gateway, S3, and DynamoDB, enabling cost-efficient, event-driven workflows with centralized monitoring via CloudWatch.
- Integrated AI-powered features into e-commerce applications, including chatbots and recommendation engines leveraging Machine Learning, Deep Learning, and NLP models, boosting customer engagement.
- Automated development workflows by setting up CI/CD pipelines with GitHub Actions, and ensured quality with unit testing (Jest) and end-to-end testing (Cypress).
- Enhanced team productivity by mentoring junior developers and enforcing clean code practices (SOLID, TDD) across the engineering team.
- Partnered with stakeholders to define technical roadmaps, ensuring long-term scalability and seamless integration of new AI-driven features.

Used languages and technologies: React.js, Node.js, Python, RESTful APIs, GraphQL, Redux, MongoDB, AWS (Amplify, ECS, Lambda, API Gateway, DynamoDB, S3, CloudWatch), RabbitMQ, AI/ML, NLP, Jest, Cypress, GitHub Actions

Teleperformance

Senior Web Developer

10.2021 – 08.2023

Main achievements and responsibilities:

- Developed a scalable web application using React.js and Node.js, achieving a 30% increase in user engagement.
- Participated in the full software development lifecycle, from requirements gathering to deployment in production.
- Utilized React Hooks to streamline lifecycle processes, improving stability and responsiveness.
- Optimized performance through database design and query tuning on Azure Cosmos DB, reducing query execution time and improving scalability.
- Executed responsive design with Chakra UI, ensuring cross-device and cross-browser compatibility.
- Integrated real-time features with Ably and connected third-party APIs including GoodRx, Stripe, Google Maps, and Twilio to expand application functionality.
- Built RESTful APIs with Node.js and Python for microservices, ensuring robust data exchange across distributed systems.
- Deployed and scaled applications on Microsoft Azure (App Service, Blob Storage, Cosmos DB) with strict security and monitoring policies.
- Containerized microservices with Docker and orchestrated them using Kubernetes and Helm, simplifying deployment pipelines and resource management.
- Mentored junior developers and led code reviews to enforce clean architecture, SOLID principles, and best practices.
- Partnered with business stakeholders to define technical solutions that improved customer satisfaction and supported long-term growth strategies.
- Introduced automation and AI-driven monitoring tools to proactively detect issues, reducing downtime and improving overall system reliability.

Used languages and technologies: React.js, Next.js, Node.js, Python, RESTful APIs, Chakra UI, Redux, Cypress, Jest, Azure Cosmos DB, Azure App Service, Azure Blob Storage, Ably, Kafka, Docker, Kubernetes, Helm

Tech Mahindra

Senior Web Developer

11.2019 – 10.2021

Main achievements and responsibilities:

- Integrated third-party APIs (payment and accounting systems) to enable seamless communication with external services and improve financial operations.
- Designed dynamic, multi-browser compatible micro-frontends using React.js, MaterialUI, and TypeScript with Redux, delivering consistent user experiences.
- Built RESTful APIs and backend microservices with Node.js and Python, ensuring efficient data exchange between frontend and backend.
- Enabled inter-service communication via AWS SQS, improving reliability and scalability of distributed microservices.
- Implemented real-time notifications with AWS SNS and Lambda, enhancing application interactivity and responsiveness.
- Contributed to database design and optimization using AWS RDS (PostgreSQL), ensuring data integrity, high availability, and faster query performance.
- Actively participated in Agile development methodologies, consistently delivering high-quality features on time.
- Improved system resilience and scalability by adopting cloud-native patterns and event-driven architectures.
- Collaborated with cross-functional teams and mentored developers on best practices for microservices and cloud deployment.

Vydr.io

Web Developer

06.2016 – 11.2019

- Developed a high-performing single-page application (SPA) for the financial sector using React, Redux, and Laravel, achieving a 30% increase in user interaction and performance.
- Optimized website load time by 35% through frontend techniques (code minification, image optimization, CSS sprites), improving SEO and securing top 5 Google search ranking.
- Designed and executed rigorous testing protocols with Jest and Cypress, reducing post-launch bug reports by 75% and ensuring reliable releases.
- Built and maintained CI/CD pipelines with Git, streamlining deployments and improving developer productivity.
- Optimized database interactions in MySQL, reducing server load by 40% and improving query performance by 15% through indexing and tuning.
- Delivered responsive, user-friendly web applications on Shopify and WordPress, leveraging AMP to increase mobile traffic by 25%.
- Integrated RESTful APIs with third-party services to expand functionality and improve end-user experience.
- Collaborated closely with designers and backend engineers to ensure alignment on UI/UX, performance, and scalability requirements.

Used languages and technologies: React.js, TypeScript, Node.js, Python, RESTful APIs, Redux, MaterialUI, AWS SQS, AWS SNS, AWS Lambda, AWS RDS (PostgreSQL), Agile

EDUCATION

Bachelor's Degree in Computer Science

Universidad de las Américas Puebla

04.2009-09.2014
