Ernesto Gama Jimenez

Senior Full-Stack Developer

ernesto.gama.jimenez@gmail.com +57 323 462 1392 Pereira, Risaralda, Colombia

SUMMARY

Senior Full Stack Engineer with 10+ years of experience building scalable, high-performance web applications. Skilled in React.js, Node.js, SQL, NoSQL, and AWS cloud infrastructure, with a strong focus on clean architecture, code quality, and DevOps best practices. Proven record of accomplishment working in agile teams, mentoring developers, and delivering end-to-end features across Microservices and serverless architectures. Combines deep technical expertise with a collaborative mindset, ensuring alignment between technical solutions and business objectives. Experienced in optimizing workflows, enforcing coding standards, and driving continuous delivery in cloud-native environments.

TECHNOLOGY SUMMARY

Languages:	JavaScript(ES6), Typescript, Python, C++, HTML5, CSS3, PHP
Frameworks and Libraries:	React.js, Angular, Next.js, Gatsby, Node.js, Express, React Native, Redux, RxJs, REST API, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM
Database Management System:	MySQL, MongoDB, AWS DynamoDB, AWS RDS, MS SQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Terraform, Docker, Kubernetes, Jenkins, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Testing	Cypress, Jest, Jasmin, Mocha
Methodologies:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts

LANGUAGE

English: Bilingual

Spanish: Native

PROFESSIONAL EXPERIENCE

Rootstack

Senior Software Engineer

09.2023 – 06.2025

Main achievements and responsibilities:

- Collaborated with cross-functional teams (UI/UX designers, project managers, and stakeholders) to define requirements and ensure alignment with project goals.
- Engineered high-performance, dynamic user interfaces using React.js, Redux, and Next.js, improving user experience and front-end performance in complex web applications
- Designed and implemented robust RESTful APIs using Node.js and Express, ensuring secure, scalable, and maintainable backend services.
- Developed and optimized MySQL database schemas, implemented complex queries, and performed performance tuning, achieving significant improvements in query execution and overall system responsiveness.
- Architected scalable microservices using Node.js, deployed on AWS ECS, and implemented inter-service communication with RabbitMQ to ensure fault tolerance and high throughput.
- Leveraged AWS services (Lambda, API Gateway, S3, CloudWatch) for serverless components, monitoring, and secure data handling.
- Integrated AI-driven features, including chatbots with Machine Learning and Natural Language Processing (NLP), enhancing user engagement.
- Maintained CI/CD pipelines with GitHub Actions, automated testing using Jest (unit tests) and Cypress (E2E), streamlining development and deployment processes.

Used languages and technologies: React.js, Redux, Next.js, MaterialUI, Cypress, Jest, Node.js, Express, MongoDB, AWS Amplify, AWS Cognito, AWS Lambda, AWS AppSync, AWS API Gateway, AWS EC2, AWS S3, AWS IVS, AWS CloudWatch, AMI, RabbitMQ, AI, Machine Learning, Depth Learning, Natural Language Processing (NLP), Git Bash, PowerShell

Teleperformance

Senior Web Developer

10.2021 – 08.2023

Main achievements and responsibilities:

- Engineered high-throughput web applications using React and Node.js, achieving a 30% increase in user engagement and optimized performance under heavy traffic.
- Designed and implemented robust RESTful APIs to support scalable and maintainable backend services.
- Leveraged React Hooks to optimize lifecycle management, improving system stability and user experience.
- Designed and optimized relational database systems in MySQL, ensuring efficient queries and data integrity.
- Delivered responsive and accessible user interfaces using modern UI frameworks, ensuring cross-platform compatibility.
- Integrated real-time features and external APIs (Stripe, Google Maps, Twilio, GoodRx) to expand functionality and deliver seamless user experiences.
- Deployed and scaled microservices using Docker and Kubernetes, ensuring reliability, security, and rapid deployment cycles.
- Mentored junior developers, conducted code reviews, and enforced best practices to maintain high-quality standards across the development team.

Used languages and technologies: React.js, Next.js, Chakra UI, Redux, Cypress, Jest, Node.js, Azure CosmosDB, Git Bash, PowerShell, Ably, Kafka

Tech Mahindra

Senior Web Developer

11.2019 – 10.2021

Main achievements and responsibilities:

- Built high-throughput web applications using React.js and Node.js, ensuring scalable, maintainable, and responsive frontend and backend systems.
- Designed and implemented robust RESTful APIs to enable efficient communication between frontend and backend services.
- Integrated third-party APIs, including payment and accounting systems, providing seamless interaction with external services.
- Developed dynamic, multi-browser compatible pages using React.js, Material UI, TypeScript, and Redux, optimizing component reusability and application performance.
- Designed and optimized relational databases using MySQL (PostgreSQL), ensuring data integrity, scalability, and low-latency queries.
- Implemented real-time notifications with AWS Lambda and SNS to enhance application interactivity.
- Built microservices architecture with Node.js, enabling inter-service communication via AWS SQS, improving scalability and reliability.
- Participated in Agile workflows, meeting deadlines while delivering high-quality, performant software solutions.

Vydr.io

Web Developer

06.2016 – 11.2019

- Developed a high-performance single-page application (SPA) for the financial sector using React and Redux, achieving a 30% increase in user engagement and improved system performance.
- Designed and implemented robust RESTful APIs to facilitate efficient data exchange between frontend and backend systems.
- Optimized MySQL database queries and applied indexing strategies, reducing database load by 40% and improving data retrieval performance by 15%.
- Enhanced frontend performance with techniques like code minification, image optimization, and CSS sprites, improving load times by 35% and boosting SEO to reach top 5 Google search results.
- Delivered responsive, user-friendly web applications, leveraging AMP and local/session storage to increase mobile traffic by 25% and enhance user experience.
- Applied rigorous testing protocols using Jest and Cypress, integrated into CI/CD pipelines with Git, reducing post-launch bugs by 75% and ensuring high-quality releases.

Used languages and technologies: JavaScript, Typescript, React.js, Redux, WebSocket, Angular, RxJs, Next.js, SASS, Node.js, MongoDB, ASP.NET Core, WebAPI, MS SQL, AWS DynamoDB, AWS RDS, GraphQL, AWS, Azure cloud services, Jest, Mocha, SCSS, SASS, Babel, Webpack, Git Bash, PowerShell,

EDUCATION

Bachelor's Degree in Computer Science

Universidad de las Américas Puebla

04.2009-09.2014
