Ernesto Gama Jimenez

Senior Full-Stack Developer

ernesto.gama.jimenez@gmail.com +57 323 462 1392 Pereira, Risaralda, Colombia

SUMMARY

Senior Full Stack Engineer with 10+ years of experience building scalable, high-performance web applications. Skilled in React.js, Node.js, SQL, NoSQL, and AWS cloud infrastructure, with a strong focus on clean architecture, code quality, and DevOps best practices. Proven record of accomplishment working in agile teams, mentoring developers, and delivering end-to-end features across Microservices and serverless architectures. Combines deep technical expertise with a collaborative mindset, ensuring alignment between technical solutions and business objectives. Experienced in optimizing workflows, enforcing coding standards, and driving continuous delivery in cloud-native environments.

TECHNOLOGY SUMMARY

Languages:	JavaScript(ES6), Typescript, Python, C++, HTML5, CSS3, PHP
Frameworks and Libraries:	React.js, Angular, Next.js, Gatsby, Node.js, Express, NestJS, React Native, Redux, RxJs, REST API, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM
Database Management System:	MySQL, MongoDB, AWS DynamoDB, AWS RDS, MS SQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Terraform, Docker, Kubernetes, Jenkins, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Testing	Cypress, Jest, Jasmin, Mocha
Methodologies:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts

LANGUAGE

English: Bilingual

Spanish: Native

PROFESSIONAL EXPERIENCE

Rootstack

Senior Software Engineer

09.2023 – 06.2025

Main achievements and responsibilities:

- Collaborated closely with UI/UX designers, project managers, and stakeholders to gather requirements, refine specifications, and ensure alignment with project goals.
- Implemented and optimized user interfaces using React.js, Redux, and Next.js, micro-frontend hosted on AWS Amplify, resulting in enhanced user experiences and improved overall system performance.
- Developed scalable and efficient back-end solutions using Node.js, incorporating GraphQL with MongoDB
- Implemented complex queries and data migrations with TypeORM, reducing query execution time by 30% and enhancing overall application efficiency.
- Designed and deployed Microservices architecture on AWS Elastic Container Service (ECS) with inter-service communication through RabbitMQ, enhanced scalability and reliability of the web application.
- Implemented Serverless architecture using AWS API Gateway and Lambda function, and auto-save on AWS S3 and DynamoDB, implement centralized monitoring using AWS CloudWatch
- Integrate Chatbot feature on e-commerce web application using various AI technology including Machine Learning, Depth Learning and Natural Language Processing (NLP).
- Implemented and maintained continuous integration and deployment pipelines (CI/CD) using GitHub actions, Unit test using Jest, E2E test using Cypress, and optimized development workflows.

Used languages and technologies: React.js, Redux, Next.js, MaterialUI, Cypress, Jest, Node.js, Express, MongoDB, AWS Amplify, AWS Cognito, AWS Lambda, AWS AppSync, AWS API Gateway, AWS EC2, AWS S3, AWS IVS, AWS CloudWatch, AMI, RabbitMQ, AI, Machine Learning, Depth Learning, Natural Language Processing (NLP), Git Bash, PowerShell

Teleperformance

Senior Web Developer

10.2021 – 08.2023

Main achievements and responsibilities:

- Developed a scalable web application using React and Node, resulting in a 30% increase in user engagement.
- Participated in the full software development lifecycle, from requirements gathering to deployment.
- Exclusively used React-Hooks to handle application life-cycle processes, enhancing user experience and system stability.
- Optimized application performance through effective database design and query optimization based on various data models on Azure Cosmos DB.
- Executed responsive web design using Chakra UI, ensuring compatibility across various devices and browsers.
- Enhanced application functionality by implementing real-time features with Ably and integrated third-party services and APIs such as GoodRx, Stripe, Google Map, Twilio.
- Ensured application scalability and security through effective cloud deployment strategies on Microsoft Azure (Azure App Service, Azure Blog Storage, and Azure Cosmos DB).
- Containerized these Microservices using Docker, resulting in improved deployment and scalability, and orchestrated the Microservices using Kubernetes and Helm, streamlining container management and resource allocation.
- Mentored junior developers and conducted code reviews to maintain code quality and adherence to best practices.

Used languages and technologies: React.js, Next.js, Chakra UI, Redux, Cypress, Jest, Node.js, Azure CosmosDB, Git Bash, PowerShell, Ably, Kafka

Tech Mahindra

Senior Web Developer

11.2019 – 10.2021

Main achievements and responsibilities:

- Integrated third-party APIs including payment system and accounting system, ensuring seamless communication with external services.
- Designed dynamic and multi-browser compatible pages based on micro-frontend using React.js and MaterialUI with Typescript, implementing the Redux data structure.
- Node.js was Utilized Node.js on the backend to implement Microservices architecture, implemented intercommunication between Microservices using AWS SQS, along with the construction of APIs to enable efficient data exchange between the front-end and back-end systems.
- Implemented real-time notification using AWS SNS and Lambda, enhancing the overall interactivity and responsiveness of the applications.
- Contributed to database design and optimization, employing AWS RDS (PostgreSQL) database to ensure data integrity, scalability, and retrieval efficiency.
- Actively participated in Agile development methodologies, consistently meeting project deadlines and ensuring the successful delivery of high-quality software solutions.

Used languages and technologies: React.js, Next.js, Chakra UI, Redux, Cypress, Jest, Node.js, Azure CosmosDB, Git Bash, PowerShell, Ably, Kafka

Vydr.io

Web Developer

06.2016 – 11.2019

- Took part in the development of a high-performing single-page application (SPA) for the financial sector using React, Redux, WordPress, Shopify, and Laravel, achieving a 30% increase in user interaction and performance
- Optimized website load time by 35% using frontend optimization techniques such as code minification, image optimization, and CSS sprites, and improve SEO ranking, making it to the top 5 Google search results.
- Formulated and applied rigorous testing protocols using Jest and Cypress, reducing post-launch bug reports by 75% and ensuring high-quality releases, implemented CI/CD pipeline and version control using Git.
- Optimized database queries and interactions with MySQL, reducing database load by 40%, and implemented proper indexing, contributing to a 15% improvement in data retrieval performance
- Delivered responsive, user-friendly web applications on platforms like Shopify and WordPress, leveraging AMP to increase mobile traffic by 25% and implementing local and session storage for better user experiences.

Used languages and technologies: JavaScript, Typescript, React.js, Redux, WebSocket, Angular, RxJs, Next.js, SASS, Node.js, MongoDB, ASP.NET Core, WebAPI, MS SQL, AWS DynamoDB, AWS RDS, GraphQL, AWS, Azure cloud services, Jest, Mocha, SCSS, SASS, Babel, Webpack, Git Bash, PowerShell,

EDUCATION

Bachelor's Degree in Computer Science

Universidad de las Américas Puebla

04.2009-09.2014
