Ernesto Gama Jimenez

Senior Full-Stack Developer

ernesto.gama.jimenez@gmail.com +57 323 462 1392 Pereira, Risaralda, Colombia

SUMMARY

Seasoned Full-Stack Web Developer with over 10 years of experience specializing in Vue.js for modern, responsive frontends and Node.js (Express, NestJS) for robust backend development. Proven track record in designing and delivering scalable, reliable, and maintainable web applications across diverse industries.

Expert in building modular, high-performance user interfaces with Vue.js, Vuex, and TypeScript, ensuring accessibility, responsiveness, and seamless user experiences. On the backend, skilled in developing RESTful and GraphQL APIs, microservices architectures, and event-driven systems with Node.js, integrating with both SQL (PostgreSQL, MySQL) and NoSQL (MongoDB, DynamoDB) databases.

TECHNOLOGY SUMMARY

Languages:	JavaScript(ES6), Typescript, Python, C++, HTML5, CSS3, PHP
Frameworks and Libraries:	Vue.js, Next.js, Gatsby, Node.js, Express, React Native, Redux, RxJs, REST API, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM
Database Management System:	MySQL, MongoDB, AWS DynamoDB, AWS RDS, MS SQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Terraform, Docker, Kubernetes, Jenkins, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Testing	Cypress, Jest, Jasmin, Mocha
Methodologies:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts

LANGUAGE

English: Bilingual

Spanish: Native

PROFESSIONAL EXPERIENCE

Rootstack

Senior Software Engineer

09.2023 – 06.2025

Main achievements and responsibilities:

- Collaborated with cross-functional teams in an Agile (Scrum) environment, contributing to all phases of the SDLC and ensuring alignment between technical and business goals.
- Led the redesign of a client-facing portal using Vue.js, Vuex, and TypeScript, delivering a modern, responsive UI that improved customer satisfaction by 35%.
- Developed and optimized backend systems with Node.js, Express, and MongoDB, achieving a 30% improvement in data query performance and scalability.
- Partnered with data science teams to implement AI-powered chatbot features, integrating NLP services into customer workflows via serverless Node.js functions on AWS Lambda.
- Streamlined CI/CD pipelines using GitHub Actions and AWS CodePipeline, reducing release-related issues and accelerating feature deployment timelines.
- Worked closely with UI/UX designers and stakeholders to deliver modular Vue.js components, ensuring cross-browser compatibility and accessibility, deployed on AWS cloud infrastructure.
- Improved application performance through Node.js API optimizations, caching strategies, and real-time monitoring with AWS CloudWatch, reducing latency and navigability issues by 30%.
- Mentored junior developers on best practices in Vue.js, Node.js, and cloud-native development, conducting code reviews and promoting SOLID principles and TDD.
- Supported IT operations by integrating ticketing automation with Node.js microservices, improving internal response times and service efficiency by 10%.

Used languages and technologies: Vue.js, Vuex, TypeScript, Node.js, Express, NestJS, MongoDB, PostgreSQL, REST API, GraphQL, AWS (Lambda, AppSync, API Gateway, S3, EC2, Cognito, CloudWatch, Amplify, IVS), RabbitMQ, AI/ML, NLP, Jest, Cypress, Docker, GitHub Actions.

Teleperformance

Senior Web Developer

10.2021 – 08.2023

Main achievements and responsibilities:

- Led frontend optimization efforts using Vue.js, Vuex, and TypeScript, applying responsive design principles that improved mobile user retention by 40% and boosted overall user engagement by 30%.
- Designed and deployed a Node.js-based microservices architecture in a TDD environment, enabling the platform to handle 100,000+ concurrent users while reducing deployment times and halving server resource consumption.
- Migrated systems to cloud-native infrastructure on AWS, integrating AI-powered analytics that improved predictive accuracy by 35% and enhanced overall scalability.
- Engineered RESTful and GraphQL APIs with Node.js + Express/NestJS, reducing backend response time by 40% and integrating third-party services to expand platform capabilities.
- Built a real-time communication system leveraging WebSockets (Ably/Kafka) with intelligent summarization, improving the effectiveness of in-platform interactions.
- Optimized database performance with MongoDB and Azure CosmosDB, applying advanced indexing/query optimization for a 15% performance gain and a 40% reduction in server load.
- Developed interactive Vue.js dashboards for analytics and reporting, giving stakeholders real-time actionable insights and faster decision-making.
- Streamlined deployment by containerizing services with Docker and orchestrating infrastructure on Kubernetes, improving resource utilization and system maintainability.

Used languages and technologies: Vue.js, Vuex, TypeScript, Node.js, Express, NestJS, MongoDB, Azure CosmosDB, REST API, GraphQL, Ably, Kafka, AWS (Lambda, ECS, S3, API Gateway, CloudWatch), Docker, Cypress, Jest, GitHub Actions.

Tech Mahindra

Senior Web Developer

11.2019 – 10.2021

Main achievements and responsibilities:

- Integrated third-party APIs (payment systems, accounting platforms), ensuring seamless communication with external services and improving system interoperability.
- Developed dynamic, cross-browser compatible pages using Vue.js, Vuex, Tailwind CSS, and TypeScript within a micro-frontend architecture, improving modularity and maintainability.
- Implemented backend microservices with Node.js (Express/NestJS), using AWS SQS for inter-service communication and building REST/GraphQL APIs to enable efficient data exchange with frontend systems.
- Built real-time notification features leveraging AWS SNS and AWS Lambda, enhancing responsiveness and user interactivity across applications.
- Contributed to database design and optimization using AWS RDS (PostgreSQL), ensuring data integrity, scalability, and fast retrieval through indexing and query optimization.
- Actively collaborated in Agile/Scrum workflows, ensuring timely delivery of high-quality, production-ready software solutions that aligned with client needs.

Used languages and technologies: Vue.js, Vuex, TypeScript, Node.js, Express, NestJS, Tailwind CSS, PostgreSQL (AWS RDS), AWS SQS, AWS SNS, AWS Lambda, REST API, GraphQL, Agile (Scrum).

Vydr.io

Web Developer

06.2016 – 11.2019

- Developed a high-performing single-page application (SPA) for the financial sector using Vue.js, Node.js, and TypeScript, achieving a 30% increase in user engagement and overall performance.
- Optimized website load time by 35% through techniques like code splitting, lazy loading, image optimization, and caching strategies, which also improved SEO rankings to reach the top 5 Google search results.
- Implemented automated testing protocols with Jest, Mocha, and Cypress, reducing post-release bug reports by 75% and ensuring reliable, production-ready deployments via CI/CD pipelines with GitHub Actions and Git.
- Optimized database queries and interactions with MySQL, MongoDB, and AWS RDS, applying indexing and query tuning that cut database load by 40% and improved retrieval speed by 15%.
- Delivered responsive, mobile-first applications on headless CMS platforms (e.g., WordPress, Shopify APIs), leveraging AMP and modern storage strategies (local/session storage) to boost mobile traffic by 25%.
- Collaborated in a hybrid cloud environment (AWS + Azure), integrating GraphQL APIs, WebSockets, and DynamoDB, ensuring scalability and real-time interactions.

Used languages and technologies: Vue.js, Vuex, TypeScript, Node.js, Express, MongoDB, MySQL, PostgreSQL (AWS RDS), DynamoDB, GraphQL, WebSockets, Jest, Mocha, Cypress, Docker, AWS (Lambda, S3, API Gateway, CloudWatch), Azure App Services, GitHub Actions, Webpack, Babel, SASS, Tailwind CSS.

EDUCATION

Bachelor's Degree in Computer Science

Universidad de las Américas Puebla

04.2009-09.2014
