Juan Monroy

SENIOR SOFTWARE ENGINEER

+57 3226983288 • juandavidmonroy617@gmail.com • https://www.linkedin.com/in/edwar-gomez/ • Pereira, Colombia

Versatile and results-driven full-stack web developer with over 10 years of hands-on experience in building and maintaining robust, scalable web applications. Proficient in both front-end and back-end development, with deep expertise in modern JavaScript frameworks such as Angular and React on the front end, and Node.js on the back end. Highly skilled in developing distributed systems and architecting solutions that drive performance and user engagement.

Consistently adheres to modern development practices, including Agile and Scrum methodologies, ensuring efficient and timely project delivery. Equally effective as a collaborative team player and independent contributor, capable of proactively identifying challenges, implementing process improvements, and delivering innovative solutions.

As a team lead, experienced in conducting thorough code reviews, mentoring junior developers, and working closely with project managers and clients to align technical outcomes with business goals. Recognized for strong communication skills, a proactive mindset, and a commitment to continuous learning and team performance enhancement.

PROFESSIONAL EXPERIENCE

GlobalStack 11.2021 – 06.2025

Senior Software Engineer

- Led a team of 9 developers in a fast-paced Agile environment, applying Scrum methodology throughout the full software development life cycle to ensure timely and high-quality deliverables.
- Worked closely with UI/UX designers, project managers, and stakeholders to gather requirements and refine specifications, leveraging SharePoint for enterprise content management and collaboration.
- Leveraged AWS cloud services to deploy and test applications at scale, enhancing reliability and performance across environments.
- Built and optimized front-end applications using Angular and micro-frontend architecture, hosted on AWS Amplify, resulting in improved user experience and performance across distributed components.
- Developed scalable, maintainable back-end services using Node.js, integrating GraphQL APIs with AWS AppSync and MongoDB, ensuring fast and flexible data handling.
- Designed and deployed Microservices architecture using AWS ECS, with RabbitMQ for robust inter-service messaging and improved application scalability.
- Implemented live video streaming functionality with AWS IVS, along with automatic video storage and processing using AWS S3, CloudWatch, and Lambda, enhancing content delivery and automation
- Integrated AI-driven chatbot features using Machine Learning, Deep Learning, and Natural Language Processing (NLP) to enhance customer engagement within the e-commerce platform.
- Actively participated in Agile ceremonies, including sprint planning, daily stand-ups, and retrospectives, fostering team alignment and continuous improvement.
- Mentored junior developers, conducted regular code reviews, and fostered a culture of continuous improvement and knowledge sharing across the team.

Used languages and technologies: Angular, MaterialUI, Cypress, Jest, Node.js, Express, MongoDB, AWS Amplify, AWS Cognito, AWS Lambda, AWS AppSync, AWS API Gateway, AWS EC2, AWS S3, AWS IVS, AWS CloudWatch, AMI, RabbitMQ, AI, Machine Learning, Depth Learning, Natural Language Processing (NLP), Git Bash, PowerShell

UST 11.2017 – 10.2021

Full Stack Developer

- Developed a scalable web application using Angular and Node, leading to a 30% increase in user engagement.
- Participated in the complete software development lifecycle, from requirements gathering to deployment, following Agile practices.
- Utilized React Hooks in relevant modules to manage application life-cycle events, improving system stability and user experience.
- Optimized back-end performance by fine-tuning database interactions using Entity Framework, resulting in faster query execution and reduced server load.
- Integrated SharePoint with Node.js to create a collaborative platform for document management and internal communication.
- Designed and implemented responsive UI with Chakra UI, ensuring consistent performance across all modern browsers and devices.
- Enhanced application functionality by implementing real-time communication using SignalR, and integrated third-party APIs such as GoodRx, Stripe, Google Maps, and Twilio.
- Ensured application scalability and security through cloud-native deployment strategies using Microsoft Azure (App Service, Blob Storage, Cosmos DB).
- Containerized microservices using Docker, and orchestrated them with Kubernetes and Helm, improving deployment efficiency and scalability.
- Mentored junior developers and conducted comprehensive code reviews, maintaining high code quality and promoting best development practices.

Used languages and technologies: Angular, Chakra UI, Redux, Cypress, Jest, Node.js, Azure CosmosDB, Git Bash, PowerShell, SignalR, Kafka

SophosSolution 10.2014 – 09.2017

Senior Web Developer

- Led the development of a high-traffic e-commerce platform in a Test-Driven Development (TDD) environment, utilizing Angular for the front end and Node.js for the back end, resulting in a 20% increase in user engagement.
- Integrated multiple third-party APIs, including payment and accounting systems, enabling seamless interaction with external services.
- Designed and implemented a Microservices architecture using Node.js, with AWS SQS facilitating inter-service communication and GraphQL APIs enabling efficient front-end/back-end data exchange.
- Built real-time notification systems using AWS SNS and Lambda, significantly improving application responsiveness and interactivity.
- Contributed to database design and optimization using MS SQL and Entity Framework, ensuring data integrity, high performance, and scalability.
- Architected and deployed an e-commerce platform featuring live video streaming powered by AWS services such as IVS, Lambda, DynamoDB, API Gateway, S3, EC2, Amplify, and Cognito.
- Established CI/CD pipelines using AWS CodePipeline, automating builds, testing, and deployments to accelerate release cycles.
- Actively engaged in Agile/Scrum practices, including sprint planning, daily stand-ups, and retrospectives, ensuring timely delivery of quality software.

Used languages and technologies: JavaScript, Typescript, React.js, Redux, WebSocket, Angular, RxJs, Next.js, SASS, Node.js, MongoDB, WebAPI, MS SQL, AWS DynamoDB, GraphQL, AWS, Azure cloud services, Jest, Cypress, Mocha, SCSS, SASS, Babel, Webpack, Git Bash, PowerShell

EDUCATION

Universidad Católica de Pereira 04.2009 – 09.2014

Bachelor of Computer Science

SKILLS

Languages:	JavaScript(ES6), Typescript, C++, HTML5, CSS3, PHP, Tailwind CSS
Frameworks and Libraries:	Angular, React.js, Next.js, Node.js, Storybook, RxJs, REST API, GraphQL, Ably, Laravel, RabbitMQ, Kafka, Material UI, Ant Design, ChakaUI, React-Admin, Angular Material
Database Management System:	Firebase, MongoDB, AWS DynamoDB, MySQL, PostgreSQL, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Figma, Terraform, Docker, Kubernetes, Jenkins, Cypress, Jest, Jasmine, NgRx, DevTools, Babel, Webpack, Storybook, Azure DevOps, IIS, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, Google Cloud Computing (GCP)
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
