Juan Monroy

SENIOR SOFTWARE DEVELOPER

+57 3106916996• juandavidmonroy617@gmail.com • https://www.linkedin.com/in/freddy-alex-pied/ • Pereira, Colombia

Passionate Senior Web Developer with a strong focus on designing and building scalable, intuitive web applications React on the frontend and Node.js on the backend. Experienced in the full software development lifecycle, from concept and architecture to deployment and maintenance.

A collaborative, user-focused engineer who thrives in cross-functional Agile teams, delivering clean, maintainable code and high-quality user experiences. Dedicated to continuous learning and staying current with the latest advancements in web technologies, with a strong emphasis on performance, scalability, and long-term system sustainability.

PROFESSIONAL EXPERIENCE

GlobalTask 11.2021 – 03.2025

Senior Software Engineer

Immerss.live is an innovative platform enhancing online shopping through One-to-One Digital Clienteling and One-to-Many Livestream Shopping experiences.

- Collaborated within a cross-functional Agile team (Scrum), mentoring junior developers and performing code reviews aligned with SOLID principles and clean architecture standards.
- Rebuilt the customer-facing application using React.js, Redux, and Next.js, integrating AWS IVS for live video streaming and Shopify for seamless e-commerce, significantly improving UX and engagement.
- Designed and developed scalable backend services with Node.js, Express, GraphQL, MongoDB, and MySQL. Improved data retrieval speed by 20% by optimizing queries with TypeORM.
- Architected a Microservices system deployed via AWS ECS, enabling efficient inter-service communication through RabbitMQ and enhancing system scalability and fault tolerance.
- Integrated a real-time chatbot leveraging AI, ML, NLP, and serverless technologies (AWS API Gateway, Lambda, S3, DynamoDB) to boost customer interaction and support.
- Enhanced platform performance and maintainability, reducing navigational friction by 30% via front-end optimization and backend refactoring.
- Built and maintained CI/CD pipelines using GitHub Actions, leading to a 22% decrease in go-to-market time. Strengthened test coverage using Jest for unit tests and Cypress for end-to-end testing.

Tech Stack: React.js, Redux, Next.js, Node.js, Express.js, GraphQL, REST API, MongoDB, MySQL, TypeORM, Shopify, AWS (Lambda, ECS, API Gateway, AppSync, S3, CloudWatch, CloudFormation), Cypress, Jest, RabbitMQ, Git, Figma, AI/ML/NLP

UST 11.2017 – 10.2021

Full Stack Developer

A Place for Mom is a leading senior care referral platform that connects families with local advisors to find the best senior living solutions.

- Designed responsive user interfaces using **React.js, Tailwind CSS** and **Typescript**, improving mobile user retention by 40% and increasing engagement by 30%, while integrating **Redux** for efficient state management.
- Built and enhanced responsive, dynamic user interfaces using React.js, TypeScript, and Tailwind CSS, improving mobile retention by 40% and boosting user engagement by 30%.
- Integrated Redux for state management and developed component-driven UIs for highly interactive dashboards and tools.
- Designed and maintained scalable Node.js back-end services using NestJS, implementing a robust Microservices architecture with Kafka for event-driven communication.
- Led deployment of containerized services on AWS ECS, using CloudFormation templates for automated infrastructure provisioning, reducing deployment time by 50%.

- Created real-time analytics features and sentiment analysis pipelines with AWS Lambda, S3, and DynamoDB, increasing predictive accuracy by 35%.
- Developed a real-time communication layer using WebSockets and Ably, cutting latency by 25% and delivering AI-powered message summaries to enhance user support.
- Optimized performance of PostgreSQL queries and schemas using TypeORM, leading to a 15% improvement in database efficiency.
- Containerized services with Docker, orchestrated via Kubernetes to ensure high availability and fault tolerance for critical features.

Tech Stack: React.js, Redux, Next.js, Typescript, Tailwind CSS, Jasmine, Node.js, Nest, Kafka, RESTful API, TypeORM, PostgreSQL, GraphQL, AWS, Docker, Kubernetes, Ably, Websocket

SophosSolution 10.2014 – 09.2017

Web Developer

- Contributed to the development of a high-performance Single Page Application (SPA) for the financial sector using React, Redux, Shopify, WordPress, and Laravel, resulting in a 30% increase in user engagement and overall performance.
- Refactored and modernized legacy PHP and Laravel codebases, while building optimized RESTful APIs with Node.js and Express.js, reducing server response times by 40% and improving backend scalability and maintainability.
- Improved front-end load times by 35% through advanced optimization techniques, including code splitting, minification, image compression, and CSS sprite utilization; contributed to top 5 Google search rankings with effective SEO strategy.
- Delivered responsive and mobile-first web applications across Shopify and WordPress platforms using AMP (Accelerated Mobile Pages), increasing mobile traffic by 25% and enhancing user experience with local/session storage implementation.
- Reduced post-deployment bugs by 75% by establishing robust testing practices using Jest for unit testing and Cypress for E2E testing; integrated CI/CD pipelines with Git to streamline deployment workflows.
- Partnered closely with UX/UI designers using Adobe XD, and utilized Angular with RxJS to redesign complex internal user interfaces, improving navigation speed by 50% and increasing employee productivity by 25%.

Tech Stack: React, Redux, Angular, RxJS, TypeScript, Node.js, Express.js, PHP, Laravel, WordPress, Shopify, REST APIs, MySQL, Jest, Cypress, CI/CD, Git, AMP, SEO, Adobe XD

EDUCATION

Universidad Católica de Pereira 04.2009 – 09.2014

Bachelor of Computer Science

SKILLS

Languages:	JavaScript(ES6), Typescript, Python, C++, HTML/HTML5, CSS/CSS3, PHP
Frameworks and Libraries:	React.js, Next.js, Gatsby, Angular, Node.js, Express, React Native, Redux, RxJS, REST API, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM, Shopify, WordPress
DBMS	MySQL, MS SQL, PostgreSQL, MongoDB, AWS DynamoDB, AWS RDS, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Jenkins, Cypress, Jest, Jasmine, Terraform, Docker, Kubernetes, Redux DevTools, Babel, Webpack, Storybook, Azure DevOps, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
