Sebastian Tamayo

Senior Software Engineer

+57 3113698653• sebstiantamayo629@outlook.com• https://www.linkedin.com/in/sebastian-tamayo-pro/ • Pereira, Colombia

Accomplished Senior Web Developer with over a decade of experience designing and developing scalable, high-performance web applications. Specializes in building dynamic, responsive user interfaces using Angular and architecting secure, modular backend systems with Java Spring Boot and RESTful APIs.

Proficient across the full software development lifecycle, including enterprise-grade system design, relational data modeling, CI/CD automation, comprehensive testing strategies, and cloud-native deployments on AWS. Adept at delivering user-centered solutions in Agile environments, collaborating closely with cross-functional teams to align technical execution with business objectives.

Recognized for delivering clean, maintainable, and well-tested code, while mentoring developers and promoting engineering excellence through SOLID principles, Clean Architecture, and Test-Driven Development (TDD). Experienced in Angular performance tuning, reactive forms, and state management, as well as building resilient backend services using Spring Boot, Redis, and asynchronous messaging queues like RabbitMQ and Kafka.

Driven by a strong commitment to innovation and technical mastery, with deep expertise in modern Java and frontend ecosystems. Proven track record of delivering software solutions that enhance user experience and provide measurable business value.

PROFESSIONAL EXPERIENCE

UST

Senior Software Engineer ***06.2022 – 06.2025***

- Collaborated within a cross-functional Agile Scrum team, mentoring junior developers and conducting rigorous code reviews aligned with SOLID principles and testable modular design across both frontend and backend layers.
- Rebuilt a high-traffic, customer-facing web application using Angular, delivering a responsive, mobile-first interface with WCAG-compliant accessibility, dynamic data binding, and real-time UI updates. Integrated live streaming via AWS IVS and connected to external platforms like the Shopify Storefront API, driving increased user engagement and conversion rates.
- Engineered scalable, secure backend services with Java Spring Boot, developing modular RESTful APIs with JWT authentication, leveraging JPA/Hibernate for ORM and connecting to a robust PostgreSQL datastore with ACID-compliant transactions and schema flexibility.
- Designed a microservice-based backend architecture, containerized using Docker and deployed via Amazon ECS. Enabled real-time processing and async workflows through Apache Kafka (or Spring Batch), and WebSocket communication for event-driven features and notifications.
- Led the development of a production-ready, AI-driven chatbot using AWS Lex, AWS Lambda, and Amazon DynamoDB, supporting dynamic, intent-based conversation flows and reducing customer support workload through intelligent automation.
- Optimized Angular frontend performance using lazy loading preloading strategies and Webpack/Vite enhancements. Backend performance improvements included query optimization, Redis caching, and Spring Boot tuning (connection pooling, async execution), resulting in a 30% gain in application speed and resilience under high load.
- Designed and maintained automated CI/CD pipelines using GitHub Actions and Jenkins, incorporating full test automation with JUnit, Mockito, Protractor, Jasmine, and Cypress, ensuring rapid feedback, reduced regression risk, and faster time to production.

Tech Stack: Angular, RxJS, NgRx (or Akita), TypeScript, HTML5, SCSS, Java, Spring Boot, Spring Security, Spring Data JPA (Hibernate), REST API, PostgreSQL, Redis, DynamoDB, Apache Kafka, WebSockets, Shopify Storefront API, Docker, GitHub Actions, Jenkins, JUnit, Mockito, Jasmine, Protractor, Cypress, Webpack, Vite, WCAG, Figma, Postman, SEO, TDD

Gorilla Logic

Full Stack Engineer — *02.2018 – 05.2022*

- Designed and implemented responsive, mobile-first user interfaces using Angular, TypeScript, and SCSS, leading to a 40% increase in mobile user retention and a 30% boost in overall platform engagement.
- Developed scalable and reusable UI component libraries for enterprise dashboards using RxJS and NgRx (or Akita) for reactive state management, accelerating frontend development and ensuring consistency across teams.
- Engineered secure, high-performance backend services with Java Spring Boot, following domain-driven design and modular architecture patterns. Built RESTful APIs with Spring Security, Spring Data JPA (Hibernate), and custom DTO mapping for clean separation of concerns.
- Integrated WebSocket and Server-Sent Events (SSE) for real-time features such as live notifications and data dashboards, enhancing interactivity and user experience.
- Containerized backend services using Docker and deployed them via AWS ECS, while automating infrastructure provisioning and scaling using AWS CloudFormation, improving deployment speed and environment consistency.
- Optimized backend performance by fine-tuning PostgreSQL queries, indexing strategies, and schema normalization, reducing API response latency by 15% under peak load conditions.
- Implemented asynchronous, event-driven processing using Apache Kafka and optionally RabbitMQ, enhancing system scalability, decoupling, and resilience in distributed workloads.
- Adopted a Test-Driven Development (TDD) approach using JUnit, Mockito, and Cypress, while establishing full observability through Prometheus, Grafana, Elastic APM, and AWS CloudWatch, enabling proactive incident resolution and performance monitoring.

Tech Stack: Angular, RxJS, NgRx (or Akita), TypeScript, SCSS, Java, Spring Boot, Spring Security, Spring Data JPA (Hibernate), REST API, Apache Kafka, PostgreSQL, Redis, RabbitMQ, WebSockets (Socket.IO), SSE, Docker, AWS (ECS, Lambda, S3, CloudFormation, CloudWatch), Prometheus, Grafana, Elastic APM, Git, CI/CD (GitHub Actions, Jenkins), JUnit, Mockito, Jasmine, Protractor, Cypress, Postman, Figma, SEO, WCAG, TDD

Sophos Solutions

Senior Web Developer — *09.2015 – 02.2018*

- Led the development of a high-performance Single Page Application (SPA) for a financial services platform using Angular, RxJS, and NgRx (or Akita), achieving a 30% increase in user engagement and substantially faster client-side performance.
- Refactored a legacy monolithic system into a decoupled architecture by integrating Angular frontend with scalable, secure RESTful APIs built using Java Spring Boot, Spring Security, and JWT-based authentication. Reduced server response time by 40% and established a foundation for a maintainable, service-oriented backend.
- Improved frontend performance through advanced techniques including code splitting, lazy loading, tree shaking, and asset optimization. Implemented structured metadata, Open Graph, and JSON-LD to enhance SEO and reduce page load times by 35%.
- Delivered fully responsive, mobile-first UIs in compliance with WCAG 2.1 accessibility guidelines and optimized for Google AMP, resulting in a 25% increase in mobile traffic and significantly higher Lighthouse scores.
- Developed and maintained an end-to-end testing framework using Jasmine, Protractor, Cypress, JUnit, and Mockito, fully integrated into CI/CD pipelines via GitHub Actions and Jenkins—cutting post-release defects by 75%.
- Collaborated with UI/UX teams using Figma and Adobe XD to design and implement modular, reusable Angular components for real-time financial dashboards, improving render performance by 50% and accelerating parallel feature development across teams.

Tech Stack: Angular, RxJS, NgRx (or Akita), TypeScript, HTML5, SCSS, Java, Spring Boot, Spring Security, Spring Data JPA (Hibernate), REST API, JWT, MySQL, Redis, Vite, Webpack, Docker, AWS (ECS, Lambda, S3, CloudFormation, CloudWatch), GitHub Actions, Jenkins, JUnit, Mockito, Jasmine, Protractor, Cypress, Playwright, Postman, WCAG, Google AMP, SEO, Open Graph, JSON-LD, Google Analytics, Adobe XD, Figma, CI/CD, TDD

Web Developer ***09.2012 – 02.2015***

- Developed responsive, accessible, and standards-compliant web applications using Angular, TypeScript, HTML5, and SCSS, ensuring cross-browser consistency, WCAG 2.1 compliance, and enhanced engagement across desktop and mobile platforms.
- Engineered reusable and modular Angular components leveraging RxJS, Angular Router, and NgRx (or Akita) to build scalable frontend architectures aligned with long-term product roadmaps and design system standards.
- Designed and integrated secure, extensible RESTful APIs with Java Spring Boot, Spring Security, and Spring Data JPA (Hibernate) to support complex business workflows and domain-driven backend services.
- Optimized development pipelines by configuring Webpack, Vite, and Maven/Gradle, automating environment-specific builds and streamlining asset bundling for production deployments.
- Collaborated with backend engineers to implement caching and queuing strategies using Redis, Spring Cache, and Spring Boot's asynchronous processing features, significantly enhancing server responsiveness and scalability under peak load.
- Tuned MySQL/PostgreSQL database performance through advanced query optimization, index design, and Hibernate profiling to reduce latency and improve throughput for data-intensive endpoints.
- Reduced frontend load times by 35% through code splitting, lazy loading, asset compression, and minification, contributing to improved SEO rankings and faster user time-to-interactive.
- Maintained comprehensive testing coverage with Jasmine, Protractor, JUnit, and Mockito, integrated into GitHub Actions CI/CD pipelines to ensure continuous delivery and robust post-deployment validation.

Tech Stack: Angular, RxJS, NgRx (Akita), TypeScript, HTML5, SCSS, Java, Spring Boot, Spring Security, Spring Data JPA (Hibernate), REST API, MySQL, PostgreSQL, Redis, Webpack, Vite, Maven, Gradle, GitHub Actions, Jenkins, Azure App Service, Google Analytics, SEO, WCAG, CI/CD, Postman, Jasmine, Protractor, JUnit, Mockito, TDD, Figma

EDUCATION

Universidad Católica de Pereira 04.2005 – 09.2012

Bachelor of Computer Science

SKILLS

Languages:	C++, JS(ES6), TS, Python, C#, Rust, PHP, Java, HTML5
Frameworks and Libraries:	Angular, React.js, Next.js, Gatesby, JPA, Java SpringBoot, Hibernate,Node.js, Express, React Native, Redux, RxJS, REST API, Django, Antd, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, Shopify, WordPress
DBMS	MySQL, MS SQL, PostgreSQL, MongoDB, AWS DynamoDB, AWS RDS, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Jenkins, Cypress, Jest, Jasmine, Terraform, Docker, Kubernetes, Redux DevTools, Babel, Webpack, Storybook, Azure DevOps, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
