Sebastian Tamayo

Senior Software Engineer

+57 3113698653• sebstiantamayo629@outlook.com• https://www.linkedin.com/in/sebastian-tamayo-pro/ • Pereira, Colombia

Seasoned Senior Web Developer with over a decade of experience architecting, building, and optimizing robust, high-performance web applications. Adept at developing dynamic, mobile-first user interfaces with Angular, and engineering secure, scalable backend systems using Python, Django, and RESTful APIs.

Skilled across the full software development lifecycle—from distributed system design, relational and NoSQL data modeling, to CI/CD automation, test coverage strategies, and deploying cloud-native services with AWS, Docker, and Kubernetes. Proven track record in Agile environments, collaborating cross-functionally to deliver high-impact, user-driven solutions aligned with business goals.

Recognized for delivering clean, maintainable, and modular code, and mentoring engineering teams in SOLID principles, Clean Architecture, and Test-Driven Development (TDD). Strong background in Angular component design, frontend performance tuning, and building resilient backend services leveraging Django, Redis, and asynchronous task queues.

Driven by curiosity and innovation, with deep expertise in the Python and JavaScript ecosystems, modern DevOps practices, and a commitment to delivering real-world software that improves user experience and drives measurable business value.

PROFESSIONAL EXPERIENCE

UST

Senior Software Engineer ***06.2022 – 06.2025***

- Collaborated within a cross-functional Agile Scrum team, mentoring junior developers and conducting rigorous code reviews emphasizing SOLID principles and modular, testable design across frontend and backend codebases.
- Rebuilt a high-traffic, customer-facing web application using Angular, delivering a responsive, mobile-first UI compliant with WCAG accessibility standards, featuring dynamic data binding and real-time updates. Integrated live streaming via AWS IVS and connected with external services like Shopify Storefront API, boosting user engagement and conversion rates.
- Engineered scalable, secure backend services with Python Django and Django REST Framework, developing modular RESTful APIs with JWT authentication. Leveraged Django ORM for robust data modeling and PostgreSQL for ACID-compliant transactions and flexible schema design.
- Designed a microservices-inspired backend architecture, containerized using Docker and deployed on Amazon ECS. Enabled asynchronous workflows and real-time features through Apache Kafka, Celery, and Django Channels with WebSocket support for event-driven notifications and data streaming.
- Led development of a production-grade, AI-powered chatbot leveraging AWS Lex, AWS Lambda, and Amazon DynamoDB, delivering dynamic intent-based conversation flows and reducing customer support overhead via intelligent automation.
- Optimized Angular frontend performance with lazy loading, preloading strategies, and build pipeline enhancements using Webpack and Vite. Improved backend efficiency through query optimization, Redis caching, and Django performance tuning (connection pooling, async task execution), resulting in a 30% improvement in application speed and resilience under high traffic.
- Architected and maintained automated CI/CD pipelines using GitHub Actions and Jenkins, integrating comprehensive testing suites with Pytest, Factory Boy, Jasmine, Protractor, and Cypress to enable rapid feedback, reduce regression risk, and accelerate time-to-market.

Tech Stack: Angular, RxJS, NgRx (Akita), TypeScript, HTML5, SCSS, Python, Django, Django REST Framework, Django Channels, Celery, REST API, PostgreSQL, Redis, DynamoDB, Apache Kafka, WebSockets, Shopify Storefront API, Docker, AWS, GitHub Actions, Jenkins, Pytest, Factory Boy, Jasmine, Protractor, Cypress, Webpack, Vite, WCAG, Figma, Postman, SEO, TDD

Gorilla Logic

Full Stack Engineer *02. 2018 – 05.2022*

- Designed and implemented responsive, mobile-first UIs using Angular, TypeScript, and SCSS, which led to a 40% increase in mobile user retention and a 30% improvement in overall platform engagement.
- Developed scalable, reusable UI component libraries for enterprise dashboards, utilizing RxJS and NgRx (or Akita) for reactive state management, accelerating development velocity and ensuring visual consistency across teams.
- Built secure, high-performance backend services with Python Django, adhering to domain-driven design and modular architecture. Designed clean, RESTful APIs using Django REST Framework, Django's authentication system, and custom serializers for clear separation of concerns.
- Integrated WebSockets (via Django Channels) and Server-Sent Events (SSE) for real-time features such as live alerts and data streaming dashboards, significantly improving interactivity and responsiveness.
- Containerized backend services using Docker and deployed them to ECS, automating infrastructure provisioning and scaling via AWS CloudFormation, which improved deployment consistency and reduced time-to-delivery.
- Optimized backend performance through query profiling, indexing, and data normalization in PostgreSQL, reducing API response latency by 15% during high-load periods.
- Implemented asynchronous, event-driven workflows using Apache Kafka and optionally RabbitMQ, increasing system scalability and resilience in distributed processing environments.
- Practiced Test-Driven Development (TDD) using Pytest, Factory Boy, and Cypress, while setting up full observability with Prometheus, Grafana, Elastic APM, and AWS CloudWatch for proactive incident response and performance insights.

Tech Stack: Angular, TypeScript, RxJS, NgRx (Akita), HTML5, SCSS, Python, Django, Django REST Framework, Django Channels, REST API, JWT, PostgreSQL, Redis, Apache Kafka, RabbitMQ, WebSockets (Socket.IO), SSE, Docker, AWS (ECS, Lambda, S3, CloudFormation, CloudWatch), Prometheus, Grafana, Elastic APM, Git, GitHub Actions, Jenkins, Pytest, Factory Boy, Cypress, Jasmine, Protractor, Postman, Figma, SEO, WCAG, TDD

Sophos Solutions

Senior Web Developer *09.2015 – 02.2018*

- Spearheaded the development of a high-performance Single Page Application (SPA) for a financial services platform using Angular, RxJS, and NgRx (or Akita), resulting in a 30% increase in user engagement and significantly faster client-side rendering.
- Modernized a legacy monolithic system by decoupling the frontend from backend services, integrating Angular with scalable, secure RESTful APIs developed in Python Django, Django REST Framework, and JWT-based authentication, leading to a 40% reduction in server response time and greater backend modularity.
- Boosted frontend performance using advanced techniques such as code splitting, lazy loading, tree shaking, and asset optimization. Enhanced SEO visibility through implementation of structured metadata, Open Graph, and JSON-LD, improving page speed scores by 35%.
- Delivered fully responsive, mobile-first UIs conforming to WCAG 2.1 accessibility standards and Google AMP optimization, driving a 25% increase in mobile traffic and substantial improvements in Lighthouse accessibility and performance metrics.
- Established an end-to-end testing strategy using Jasmine, Protractor, Cypress, Pytest, and Factory Boy, fully integrated into CI/CD pipelines via GitHub Actions and Jenkins, which reduced post-release defects by over 75%.
- Partnered with UI/UX designers using Figma and Adobe XD to create modular, reusable Angular components for dynamic, real-time financial dashboards—improving render speed by 50% and enabling faster parallel development across teams.

Tech Stack: Angular, TypeScript, RxJS, NgRx (Akita), HTML5, SCSS, Python, Django, Django REST Framework, JWT, MySQL, Redis, Webpack, Vite, Docker, AWS (ECS, Lambda, S3, CloudFormation, CloudWatch), GitHub Actions, Jenkins, Jasmine, Protractor, Cypress, Pytest, Factory Boy, Playwright, Postman, Google AMP, WCAG, SEO, Open Graph, JSON-LD, Google Analytics, Adobe XD, Figma, CI/CD, TDD

Web Developer ***09.2012 – 02.2015***

- Developed responsive, accessible, and standards-compliant web applications using Angular, TypeScript, HTML5, and SCSS, ensuring cross-browser consistency, WCAG 2.1 accessibility, and increased user engagement across desktop and mobile platforms.
- Architected modular Angular components leveraging RxJS, Angular Router, and NgRx (or Akita) to support scalable, maintainable frontend architectures aligned with enterprise design systems and product evolution.
- Designed and implemented secure, RESTful backend services using Python Django, Django REST Framework (DRF), and JWT-based authentication, enabling complex workflow orchestration and role-based access control.
- Streamlined build and deployment processes by configuring Webpack, Vite, and Python packaging tools like Poetry and pip-tools, ensuring efficient environment-specific builds and production-grade asset bundling.
- Collaborated with backend engineers to enhance performance and scalability by implementing Redis caching, Celery task queues, and Django's asynchronous views, significantly reducing response times under heavy loads.
- Tuned PostgreSQL/MySQL databases with advanced query profiling, index optimization, and ORM tuning via Django ORM and raw SQL, resulting in faster data access and improved backend performance.
- Reduced frontend load times by over 30% through code splitting, lazy loading, image optimization, and asset minification, directly contributing to improved SEO and Lighthouse performance scores.
- Established robust automated testing frameworks using Jasmine, Protractor, Pytest, and Factory Boy, integrated with GitHub Actions and Jenkins CI/CD pipelines to maintain continuous delivery and high-quality deployments.

Tech Stack: Angular, TypeScript, RxJS, NgRx (Akita), HTML5, SCSS, Python, Django, Django REST Framework, JWT, PostgreSQL, MySQL, Redis, Celery, Webpack, Vite, Poetry, pip-tools, GitHub Actions, Jenkins, Azure App Service, Google Analytics, SEO, WCAG, CI/CD, Postman, Jasmine, Protractor, Pytest, Factory Boy, TDD, Figma

EDUCATION

Universidad Católica de Pereira 04.2005 – 09.2012

Bachelor of Computer Science

SKILLS

Languages:	C++, JS(ES6), TS, Python, C#, Rust, PHP, Java, HTML5
Frameworks and Libraries:	React.js, Next.js, Gatesby, Angular, Node.js, Express, React Native, Redux, RxJS, REST API, Django, Flask, FastAPI, JavaSpringBoot, Antd, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM, Shopify, WordPress, .Net Core
DBMS	MySQL, MS SQL, PostgreSQL, MongoDB, AWS DynamoDB, AWS RDS, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Jenkins, Cypress, Jest, Jasmine, Terraform, Docker, Kubernetes, Redux DevTools, Babel, Webpack, Storybook, Azure DevOps, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
