Sebastian Tamayo

Senior Software Engineer

+57 3113698653• sebstiantamayo629@outlook.com• https://www.linkedin.com/in/sebastian-tamayo-pro/ • Pereira, Colombia

Accomplished Senior Web Developer with over a decade of experience designing, building, and optimizing high-performance, scalable web applications. Expert in creating intuitive, mobile-first user interfaces using React.js, and developing secure, modular backend services with Laravel and RESTful APIs.

Proficient across the entire software development lifecycle, from system architecture and database modeling to CI/CD automation, testing, deployment, and long-term maintenance. Excels in Agile, cross-functional teams, driving rapid iteration and close collaboration with stakeholders to deliver business-aligned software solutions.

Renowned for writing clean, maintainable, and testable code, mentoring engineering teams, and upholding SOLID principles, clean architecture, and Test-Driven Development (TDD). Experienced in applying modern design patterns and performance optimization strategies to ensure scalability, reliability, and responsiveness across web platforms.

Passionate about continuous improvement and innovation, with a strong focus on modern JavaScript frameworks, PHP ecosystems, cloud infrastructure, and DevOps best practices. Committed to delivering user-centric applications that solve real-world problems and drive measurable impact for end-users and businesses alike.

PROFESSIONAL EXPERIENCE

UST

Senior Software Engineer

June 2022 – June 2025 (3 years)

- Collaborated within a cross-functional Agile (Scrum) team, mentoring junior developers and conducting in-depth code reviews focused on SOLID principles, design patterns, and clean architecture to ensure code quality and long-term maintainability.
- Led the modernization of a high-traffic, customer-facing platform using React.js, significantly improving accessibility, responsiveness, and client-side rendering performance. Integrated Azure Media Services for live auction streaming and connected with the Shopify Storefront API, resulting in increased user engagement and higher conversion rates.
- Designed and developed scalable backend services using PHP Laravel, implementing RESTful APIs and leveraging PostgreSQL and MongoDB for both relational and NoSQL data storage. Applied schema design improvements, query optimization, and indexing strategies to reduce data retrieval latency by over 20%.
- Architected a resilient microservices-based ecosystem on Azure Kubernetes Service (AKS), utilizing Azure Service Bus for asynchronous communication between distributed services, enhancing scalability, modularity, and fault tolerance.
- Spearheaded the development of an AI-powered chatbot using Azure Cognitive Services, Azure Functions, and Cosmos DB, enabling intelligent, real-time user interactions and significantly improving customer support efficiency.
- Enhanced overall application performance by optimizing React components (lazy loading, memoization, suspense boundaries) and refining backend logic, resulting in a 30% increase in load speed and user satisfaction.
- Built and maintained robust CI/CD pipelines using Azure DevOps, integrating automated testing, linting, and deployment workflows. Boosted release velocity by 22% while maintaining high quality through test suites built with PHPUnit (Laravel), Jest (React), and Cypress (E2E).

Tech Stack: React.js, TypeScript, Redux, SCSS, PHP, Laravel, REST API, PostgreSQL, MongoDB, Azure Kubernetes Service (AKS), Azure Service Bus, Azure Functions, Azure Media Services, Azure Cognitive Services, Cosmos DB, Shopify Storefront API, Docker, Kubernetes, Azure DevOps, PHPUnit, Jest, Cypress, Git, Jira, Postman

Gorilla Logic

Full Stack Engineer

February 2018 – May 2022 (4 years 4 months)

- Designed and developed responsive, mobile-first user interfaces using React.js, TypeScript, and SCSS, achieving a 40% increase in mobile user retention and a 30% boost in overall engagement.
- Built scalable, modular frontend components for enterprise-grade dashboards, leveraging Redux for efficient state management and ensuring maintainability in large, cross-functional applications.
- Engineered secure, high-performance backend services using Laravel PHP framework, applying RESTful API principles and integrating event-driven communication with tools like Redis and Laravel Echo to support real-time features.
- Automated infrastructure provisioning with AWS CloudFormation and deployed containerized services using Docker on AWS ECS, cutting deployment times by 50% and enhancing release velocity.
- Developed real-time analytics and sentiment analysis pipelines using AWS Lambda, S3, and DynamoDB, improving AI model accuracy by 35% and generating actionable data insights.
- Optimized backend performance with advanced PostgreSQL techniques, including indexing, query refactoring, and schema redesign, reducing query latency by 15%.
- Managed containerized Laravel microservices on Kubernetes, ensuring high availability, fault tolerance, and seamless zero-downtime deployments for mission-critical systems.
- Advocated Test-Driven Development (TDD) with PHPUnit and Jest, and implemented comprehensive monitoring using AWS CloudWatch, Elastic APM, and Prometheus/Grafana for real-time system observability and diagnostics.

Tech Stack:

React.js, TypeScript, Redux, SCSS, PHP (Laravel), REST API, PostgreSQL, Redis, AWS (Lambda, ECS, S3, CloudFormation, DynamoDB, CloudWatch), Docker, Kubernetes, PHPUnit, Jest, Git, Jira, Postman, Elastic APM, Prometheus, Grafana

Sophos Solutions

5 years 6 months

Senior Web Developer

September 2015 – February 2018 (2 years 6 months)

- Led the development of a high-performance Single Page Application (SPA) for a financial services platform using React.js, Redux, and React Hooks, resulting in a 30% increase in user engagement and improved client-side responsiveness.
- Modernized legacy systems by modularizing frontend components and migrating backend logic to scalable, RESTful Laravel services, achieving a 40% reduction in server response times and enhanced system maintainability.
- Optimized frontend performance through advanced techniques such as code splitting, lazy loading, tree shaking, and image compression, which cut initial load times by 35% and improved SEO with structured metadata and schema markup.
- Delivered fully responsive, mobile-first interfaces using React with AMP compliance and WCAG accessibility standards, increasing mobile traffic by 25% across key user segments and platforms.
- Developed robust testing infrastructure using Jest, React Testing Library, and Cypress, seamlessly integrated into Git-based CI/CD pipelines, resulting in a 75% decrease in production bugs and significantly enhanced release stability.
- Collaborated closely with UX/UI teams using Adobe XD to redesign enterprise-level dashboards, improving navigation performance by 50% and increasing team efficiency by 25% through a cleaner and more intuitive design system.

Tech Stack:

React.js, Redux, React Hooks, Laravel, PHP, REST API, MySQL, SCSS, TypeScript, Cypress, Jest, React Testing Library, Git, GitHub Actions, Adobe XD, AMP, CI/CD, SEO, WCAG, JSON Schema, Postman, Figma, Jira

Web Developer

September 2012 – February 2015 (2 years 6 months)

- Developed responsive, accessible, and standards-compliant web applications using React.js, TypeScript, HTML5, and CSS3, adhering to modern usability best practices and WCAG accessibility guidelines.
- Engineered reusable, modular React components leveraging functional programming, custom hooks, and context-based state management, contributing to a scalable and maintainable frontend codebase.
- Designed and implemented robust, RESTful APIs using Laravel, employing middleware pipelines, asynchronous request handling, and service-based architecture to support complex enterprise functionality.
- Optimized build and deployment workflows with Vite, Webpack, and Laravel Mix, managing environment-specific configurations and asset compilation to ensure fast, consistent delivery across staging and production environments.
- Collaborated with backend teams to integrate Laravel APIs, implement caching strategies using Redis, and streamline CI/CD pipelines with GitHub Actions and Laravel Forge, enabling fast, reliable deployments.
- Crafted and optimized advanced MySQL queries and Laravel Eloquent relationships to power analytics dashboards, using indexing, query optimization, and database schema tuning to maximize performance.
- Integrated Google Analytics and custom telemetry tools to monitor user interactions and application performance, leading to data-driven UX improvements and increased conversion rates.
- Reduced initial page load time by 35% through frontend performance enhancements including lazy loading, tree shaking, image optimization, and code minification—resulting in higher SEO rankings and improved user experience.

Tech Stack: React.js, TypeScript, HTML5, CSS3, Laravel, PHP, REST API, MySQL, Laravel Eloquent, Redis, Vite, Webpack, Laravel Mix, GitHub Actions, Laravel Forge, Google Analytics, WCAG, SEO, CI/CD, Jest, Figma, Postman, TDD

EDUCATION

Universidad Católica de Pereira 04.2005 – 09.2012

Bachelor of Computer Science

SKILLS

Languages:	C++, JS(ES6), TS, Python, C#, Rust, PHP, Java, HTML5
Frameworks and Libraries:	React.js, Next.js, Gatesby, Angular, Node.js, Express, React Native, Redux, RxJS, REST API, Django, JavaSpringBoot, Antd, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM, Shopify, WordPress
DBMS	MySQL, MS SQL, PostgreSQL, MongoDB, AWS DynamoDB, AWS RDS, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Jenkins, Cypress, Jest, Jasmine, Terraform, Docker, Kubernetes, Redux DevTools, Babel, Webpack, Storybook, Azure DevOps, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
