Sebastian Tamayo

Senior Software Engineer

+57 3113698653• sebstiantamayo629@outlook.com• https://www.linkedin.com/in/sebastian-tamayo-pro/ • Pereira, Colombia

Results-driven Senior Software Engineer with over a decade of experience designing, developing, and deploying scalable, high-performance full-stack web applications. Specializes in Node.js + TypeScript microservices, PostgreSQL, and cloud-native architectures, while building modern, responsive frontends with React.js, Next.js, and Redux.

Proficient across the software development lifecycle—from requirements gathering and system architecture to CI/CD deployment, automated testing, observability, and long-term maintenance. Experienced in integrating distributed cloud services (AWS SQS, SNS, EventBridge, Lambda, DynamoDB, ECS) and leveraging serverless architectures for event-driven solutions.

Thrives in Agile, cross-functional teams, contributing to product and engineering discussions, mentoring developers, and maintaining a strong focus on code quality, SOLID principles, clean architecture, and high test coverage. Passionate about performance optimization, system scalability, and observability, building sustainable, long-lived applications that deliver real value to end users and business stakeholders.

PROFESSIONAL EXPERIENCE

UST

Senior Software Engineer

June 2022 – June 2025 (3 years)

- Collaborated in a cross-functional Agile (Scrum) team, mentoring junior developers and conducting peer code reviews, promoting SOLID principles, clean architecture, and design patterns.
- Re-engineered the customer-facing platform using React.js, Next.js, Redux, and TypeScript, integrating AWS IVS for livestreaming and Shopify Storefront API, resulting in a measurable increase in user engagement and conversion.
- Developed and maintained scalable backend microservices in Node.js + TypeScript with PostgreSQL and MongoDB, optimizing database schemas and queries with TypeORM to reduce data retrieval time by 20%.
- Designed and deployed a microservices architecture on AWS ECS, leveraging RabbitMQ and AWS distributed services (SQS, SNS, EventBridge) for asynchronous, event-driven communication between services.
- Built a real-time, AI-powered chatbot using AWS Lambda, API Gateway, S3, and DynamoDB, supporting scalable, serverless interactions and improving customer support automation.
- Enhanced observability and incident response using CloudWatch, Datadog, LogRocket, and Sentry, enabling quick identification and resolution of escalations.
- Streamlined frontend and backend performance, reducing navigation latency and friction by over 30% through refactoring and optimization.
- Implemented and maintained CI/CD pipelines with GitHub Actions, integrating unit tests (Jest), E2E tests (Cypress/Playwright), linting, and code coverage thresholds, contributing to a 22% faster release cycle.

Tech Stack:

Node.js, TypeScript, PostgreSQL, MongoDB, GraphQL, REST API, AWS (SQS, SNS, EventBridge, Lambda, ECS, DynamoDB, CloudWatch, CloudFormation, IVS), RabbitMQ, Redis, Docker, Terraform, React.js, Next.js, Redux, Jest, Cypress, Playwright, Datadog, Sentry, LogRocket, GitHub Actions

Gorilla Logic

Full Stack Engineer

February 2018 – May 2022 (4 years 4 months)

- Engineered responsive, mobile-optimized UIs using React.js, Next.js, TypeScript, Tailwind CSS and Flutter increasing mobile retention by 40% and engagement by 30%.
- Developed modular, component-driven interfaces for complex dashboards using Redux for predictable and maintainable state management.
- Built and maintained scalable backend microservices in Node.js + NestJS with PostgreSQL, adopting a microservices architecture with Kafka for event-driven communication.
- Provisioned and managed infrastructure as code using AWS CloudFormation, deployed containerized services via Docker to AWS ECS, and implemented Kubernetes orchestration for high availability and horizontal scaling.
- Delivered real-time analytics and ETL pipelines using AWS Lambda, S3, and DynamoDB, enhancing AI/ML prediction accuracy by 35%.
- Optimized PostgreSQL performance by refactoring schemas and queries using TypeORM, improving database response times by 15%.
- Followed TDD/BDD practices using Jasmine, Jest, and Cypress, integrating automated testing into CI/CD pipelines to maintain high code quality and test coverage.
- Implemented observability and monitoring using CloudWatch, Datadog, and APM tools, enabling proactive detection and resolution of system issues.

Tech Stack:

Node.js, TypeScript, NestJS, PostgreSQL, GraphQL, Kafka, AWS (Lambda, S3, DynamoDB, ECS, CloudFormation, CloudWatch), Docker, Kubernetes, React.js, Next.js, Redux, Tailwind CSS, Jasmine, Jest, Cypress, Datadog

Sophos Solutions

5 years 6 months

Senior Web Developer

September 2015 – February 2018 (2 years 6 months)

- Contributed to the development of a high-performance SPA for the financial sector using React.js, Next.js, Redux, and TypeScript, improving user engagement and application responsiveness by 30%.
- Refactored and modularized legacy PHP/Laravel codebases while building scalable backend APIs in Node.js + Express.js with PostgreSQL, reducing server response times by 40% and improving maintainability.
- Applied advanced frontend optimization techniques (code splitting, tree shaking, minification, image compression, CSS sprites) reducing initial load time by 35% and contributing to top 5 Google search rankings.
- Developed mobile-first and AMP-compliant experiences, implementing localStorage/sessionStorage strategies to enhance client-side performance and persistence, increasing mobile traffic by 25%.
- Established automated testing pipelines with Jest (unit) and Cypress (E2E), enforcing high code coverage, reducing post-deployment bugs by 75%, and streamlining deployments through CI/CD workflows.
- Collaborated with UX/UI teams using Adobe XD and redesigned complex enterprise dashboards using Next.js and Redux, increasing navigation speed by 50% and internal productivity by 25%.
- Implemented observability and monitoring strategies using Datadog, CloudWatch, and Sentry to proactively detect and resolve system issues.

Tech Stack:

Node.js, TypeScript, Express.js, PostgreSQL, React.js, Next.js, Redux, PHP, Laravel, Jest, Cypress, AWS (Lambda, S3, CloudWatch), CI/CD, Datadog, Sentry

Web Developer

September 2012 – February 2015 (2 years 6 months)

- Built responsive, standards-compliant websites using HTML5, CSS3, JavaScript (ES6+), and SASS, aligned with modern Web 2.0 usability and accessibility standards.
- Designed and implemented reusable, testable components using React and Backbone.js, applying best practices in modular architecture and dependency injection.
- Built scalable REST-based web services with Node.js and Express.js, applying asynchronous programming patterns and middleware design for high-performance network applications.
- Employed Gulp, Grunt, and NPM scripts to automate build pipelines, handle asset bundling, preprocess stylesheets, and manage static resources for faster development cycles.
- Collaborated closely with backend teams to integrate APIs, caching layers, and proxy configurations, ensuring seamless CI/CD deployment pipelines with tailored build/test scripts.
- Developed advanced PL/SQL stored procedures and complex queries using temporary tables and procedural logic to support dynamic reporting and data transformation requirements.
- Integrated Google Analytics and custom tracking solutions to gather behavioral insights, which informed UX decisions and resulted in improved conversion funnels.
- Reduced page load time by 35% using frontend performance optimization techniques—such as JS/CSS minification, lazy loading, image compression, and CSS sprites—boosting SEO rankings to achieve a top 5 position on Google SERPs.

Tech Stack:

React, HTML5, CSS3, JavaScript (ES6+), ECMAScript, SASS, AngularJS (1.x, 2.x, 4.x), Backbone.js, Node.js, Express.js, REST API, Gulp, Grunt, NPM, SQL, PL/SQL, Google Analytics, CI/CD, SEO Optimization, Git

EDUCATION

Universidad Católica de Pereira

04.2005 – 09.2012

Bachelor of Computer Science

SKILLS

Languages:	C++, JS(ES6), TS, Python, C#, Rust, PHP, Java, HTML5
Frameworks and Libraries:	React.js, Next.js, Gatesby, Angular, Node.js, Express, React Native, Redux, RxJS, REST API, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM, Shopify, WordPress, JPA, Java Spring Boot
DBMS	MySQL, MS SQL, PostgreSQL, MongoDB, AWS DynamoDB, AWS RDS, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Jenkins, Cypress, Jest, Jasmine, Terraform, Docker, Kubernetes, Redux DevTools, Babel, Webpack, Storybook, Azure DevOps, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
