Sebastian Tamayo

Senior Software Engineer

+57 3113698653• sebstiantamayo629@outlook.com• https://www.linkedin.com/in/sebastian-tamayo-pro/ • Pereira, Colombia

Results-driven and passionate Senior Web Developer with over a decade of experience designing, developing, and deploying scalable, intuitive, and high-performance web applications. Specializes in building modern, responsive frontends with React.js, Next.js and architecting robust backends using Node.js, Express, and cloud-native services. Proficient across the entire software development lifecycle—from requirements gathering and system architecture to CI/CD deployment, testing, and long-term maintenance.

Thrives in Agile, cross-functional environments, contributing to both product and engineering discussions with a strong focus on user-centric design, code quality, and developer experience. Known for writing clean, maintainable, and well-documented code while mentoring junior developers and driving adherence to SOLID principles and clean architecture standards.

Deeply committed to continuous learning and staying up to date with evolving web technologies, cloud infrastructure, and DevOps practices. Strong advocate for performance optimization, system scalability, and building sustainable, long-lived digital products that provide real value to end users and business stakeholders.

PROFESSIONAL EXPERIENCE

UST

Senior Software Engineer

June 2022 – June 2025 (3 years)

- Collaborated in a cross-functional **Agile** (**Scrum**) team, actively mentoring junior developers and conducting peer code reviews with a focus on **SOLID** principles, design patterns, and clean architecture best practices.
- Re-engineered the customer-facing web platform using **React**.**js**, **Next**.**js**, and **Redux**, integrating **AWS IVS** for livestreaming auctions and **Shopify Storefront API** for seamless e-commerce functionality, resulting in a significant uplift in user engagement and conversion rates.
- Developed and maintained scalable backend services using **Node**.**js**, **Express**, and **GraphQL**, with data persisted in **MongoDB** and **MySQL**. Optimized query performance and relationships using TypeORM, reducing average data retrieval time by 20%.
- Designed and deployed a **microservices** architecture on AWS ECS, using **RabbitMQ** for asynchronous communication between services, improving system scalability, fault tolerance, and operational independence of core modules.
- Led the development of an intelligent, real-time chatbot powered by AI/ML and NLP, leveraging **AWS Lambda**, **API Gateway**, **S3**, and **DynamoDB** to support scalable, event-driven interactions and enhance customer support automation.
- Streamlined platform performance and user experience by refactoring frontend components and backend logic, reducing navigational latency and friction by over 30%.
- Implemented and maintained **CI/CD** pipelines with **GitHub** Actions, integrating automated testing, linting, and deployment stages—contributing to a 22% faster release cycle. Ensured application reliability with comprehensive testing using **Jest** (unit tests) and **Cypress** (E2E).

Tech Stack:

React.js, Redux, Next.js, Node.js, Express.js, GraphQL, REST API, MongoDB, MySQL, PostgreSQL, Redis, TypeORM, Prisma, NestJS, Shopify, AWS (Lambda, ECS, API Gateway, AppSync, S3, IVS, DynamoDB, CloudWatch, CloudFormation, IAM), Docker, Terraform, Vercel, Cypress, Jest, Playwright, MSW, RabbitMQ, WebSockets, Ably, Git, GitHub Actions, Postman, Figma, Notion, Jira, Adobe XD, Google Analytics, LogRocket, Sentry, AI/ML/NLP (OpenAI, AWS Comprehend, AWS Lex, Hugging Face, spaCy)

Gorilla Logic

Full Stack Engineer

February 2018 – May 2022 (4 years 4 months)

- Engineered responsive, mobile-optimized UIs using **React.js, Next.js**, **TypeScript**, and **Tailwind CSS**, leading to a 40% increase in mobile user retention and a 30% boost in engagement.
- Developed modular, **component-driven interfaces** for complex dashboards and tools, leveraging **Redux** for robust and maintainable **state management**.
- Built and maintained scalable backend services using **Node.js** and **NestJS**, adopting a **microservices architecture** with **Kafka** to enable **event-driven** data flow across domains.
- Provisioned infrastructure using **AWS CloudFormation**, and deployed containerized services via **Docker** to **AWS ECS**, reducing deployment cycle time by 50%.
- Delivered real-time analytics and sentiment analysis pipelines by orchestrating **AWS Lambda**, **S3**, and **DynamoDB**, enhancing AI prediction accuracy by 35%.
- Optimized **PostgreSQL** performance by refactoring schemas and queries using **TypeORM**, improving database response times by 15%.
- Orchestrated services using **Kubernetes** to ensure high availability, self-healing, and seamless horizontal scaling of critical applications.
- Followed **TDD** practices using Jasmine for unit tests and contributed to performance monitoring and logging strategies using **CloudWatch** and **APM** tools.

Tech Stack:

React.js, Redux, Next.js, TypeScript, Tailwind CSS, Jasmine, Node.js, NestJS, Kafka, REST API, GraphQL, TypeORM, PostgreSQL, AWS (Lambda, S3, DynamoDB, ECS, CloudFormation, CloudWatch), Docker, Kubernetes, Ably, WebSockets

Sophos Solutions

5 years 6 months

Senior Web Developer

September 2015 – February 2018 (2 years 6 months)

- Contributed to the development of a high-performance **Single Page Application** (**SPA**) for the financial sector using **React**, **Redux**, **Shopify**, **Next** resulting in a 30% improvement in user engagement and application responsiveness.
- Refactored and modularized legacy codebases in **PHP** and **Laravel**, while building scalable, **RESTful** backend APIs using **Node**.js and **Express**.js—leading to a 40% reduction in server response time and improved code maintainability.
- Applied advanced frontend optimization techniques—such as code splitting, tree shaking, minification, image compression, and **CSS** sprite maps—reducing initial load time by 35% and contributing to the app's top 5 **Google** search ranking through improved **SEO** and structured data.
- Developed mobile-first and **AMP**-compliant experiences across **Shopify** and **Express**, increasing mobile traffic by 25%. Implemented **localStorage** and **sessionStorage** strategies for enhancing client-side performance and persistence.
- Established automated testing pipelines with **Jest** (**unit**) and **Cypress** (**E2E**), reducing post-deployment bugs by 75% and streamlining deployments via Git-based **CI**/**CD** workflows.
- Collaborated closely with **UX**/**UI** teams using Adobe XD, and redesigned complex enterprise dashboards using **Next** and **Redux**, leading to a 50% improvement in navigation speed and a 25% increase in internal productivity.

Tech Stack:

React, Next, Redux, Angular, RxJS, TypeScript, JavaScript, Node.js, Express.js, PHP, Laravel, Shopify, WordPress, REST API, MySQL, Jest, Cypress, Git, CI/CD, AMP, Adobe XD

Web Developer

September 2012 – February 2015 (2 years 6 months)

- Built responsive, standards-compliant websites using **HTML5**, **CSS3**, **JavaScript** (**ES6**+), and **SASS**, aligned with modern Web 2.0 usability and accessibility standards.
- Designed and implemented **reusable**, **testable components** using **React** and **Backbone**.**js**, applying best practices in modular architecture and dependency injection.
- Built scalable REST-based web services with **Node**.js and **Express**.js, applying asynchronous programming patterns and middleware design for high-performance network applications.
- Employed **Gulp**, **Grunt**, and **NPM** scripts to automate build pipelines, handle asset bundling, preprocess stylesheets, and manage static resources for faster development cycles.
- Collaborated closely with backend teams to integrate **APIs**, caching layers, and proxy configurations, ensuring seamless **CI**/**CD** deployment pipelines with tailored build/test scripts.
- Developed advanced **PL**/**SQL** stored procedures and complex queries using temporary tables and procedural logic to support dynamic reporting and data transformation requirements.
- Integrated **Google Analytics** and custom tracking solutions to gather behavioral insights, which informed UX decisions and resulted in improved conversion funnels.
- Reduced page load time by 35% using frontend performance optimization techniques—such as **JS**/**CSS minification**, **lazy loading**, **image compression**, and **CSS sprites**—boosting **SEO** rankings to achieve a top 5 position on Google SERPs.

Tech Stack:

React, HTML5, CSS3, JavaScript (ES6+), ECMAScript, SASS, AngularJS (1.x, 2.x, 4.x), Backbone.js, Node.js, Express.js, REST API, Gulp, Grunt, NPM, SQL, PL/SQL, Google Analytics, CI/CD, SEO Optimization, Git

EDUCATION

Universidad Católica de Pereira

04.2005 – 09.2012

Bachelor of Computer Science

SKILLS

Languages:	C++, JS(ES6), TS, Python, C#, Rust, PHP, Java, HTML5
Frameworks and Libraries:	React.js, Next.js, Gatesby, Angular, Node.js, Express, React Native, Redux, RxJS, REST API, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM, Shopify, WordPress, JPA, Java Spring Boot
DBMS	MySQL, MS SQL, PostgreSQL, MongoDB, AWS DynamoDB, AWS RDS, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Jenkins, Cypress, Jest, Jasmine, Terraform, Docker, Kubernetes, Redux DevTools, Babel, Webpack, Storybook, Azure DevOps, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
