# Sebastian Tamayo

## Senior Software Engineer

+57 3113698653• sebstiantamayo629@outlook.com• https://www.linkedin.com/in/sebastian-tamayo-pro/ • Pereira, Colombia

Accomplished Senior Web Developer with over a decade of experience architecting, developing, and optimizing scalable, high-performance web applications. Specializes in building intuitive, mobile-first interfaces using React.js, and implementing secure, extensible backend solutions using WordPress (as a headless CMS) and RESTful APIs.

Skilled across the full software development lifecycle, including system design, database modeling, CI/CD automation, automated testing, and production-grade deployment. Thrives in Agile, cross-functional environments, consistently delivering business-aligned, user-centric solutions through rapid iteration and close stakeholder collaboration.

Renowned for producing clean, maintainable, and testable code, mentoring development teams, and promoting engineering excellence through SOLID principles, clean architecture, and Test-Driven Development (TDD). Adept at applying modern design patterns, frontend performance optimization, and modular backend architectures to ensure long-term scalability, reliability, and responsiveness.

Driven by a passion for continuous improvement and innovation, with deep expertise in modern JavaScript frameworks, PHP ecosystems, content-driven platforms, and DevOps best practices. Committed to delivering impactful, real-world software solutions that enhance user experience and deliver measurable value to businesses.

## PROFESSIONAL EXPERIENCE

### UST

#### *Senior Software Engineer*

June 2022 – June 2025 (3 years)

- Collaborated within a cross-functional Agile Scrum team, mentoring junior developers and conducting thorough code reviews with a focus on SOLID principles, reusable design patterns, and clean architecture, ensuring scalable, maintainable code across the stack.
- Modernized a high-traffic, customer-facing application by building a React.js frontend with enhanced accessibility, responsive design, and client-side rendering. Integrated live auction streaming via Azure Media Services and connected to the Shopify Storefront API, resulting in improved engagement and a measurable increase in conversion rates.
- Developed and maintained scalable backend functionality using WordPress as a headless CMS via REST API and Advanced Custom Fields (ACF), supporting dynamic content delivery. Leveraged both MySQL and custom post types to manage structured and unstructured data effectively.
- Architected a decoupled microservices-inspired ecosystem deployed on Azure Kubernetes Service (AKS), utilizing Azure Service Bus to orchestrate asynchronous workflows between React frontend and WordPress-powered backend services, improving fault tolerance and modularity.
- Led the creation of an AI-driven chatbot using Azure Cognitive Services, Azure Functions, and Cosmos DB, enabling real-time, intelligent user interactions that significantly enhanced the customer support experience.
- Improved frontend performance through lazy loading, memoization, and React suspense boundaries, while streamlining backend logic in WordPress using optimized queries and REST routes—achieving a 30% increase in load speed and overall user satisfaction.
- Built and maintained automated CI/CD pipelines using Azure DevOps, integrating unit testing and end-to-end testing workflows with Jest (React), Cypress (E2E), and PHPUnit (WordPress). Accelerated deployment velocity by 22% while maintaining consistent code quality.

**Tech Stack:** React.js, Redux, TypeScript, HTML5, CSS3, WordPress (REST API, ACF, PHP), MySQL, Shopify Storefront API, Azure Kubernetes Service (AKS), Azure Service Bus, Azure Functions, Azure Cognitive Services, Cosmos DB, Webpack, Vite, Jest, Cypress, PHPUnit, GitHub Actions, Azure DevOps, WCAG, Figma, Postman, SEO, TDD, CI/CD

## Gorilla Logic

### *Full Stack Engineer*

February 2018 – May 2022 (4 years 4 months)

- Designed and developed responsive, mobile-first user interfaces using React.js, TypeScript, and SCSS, achieving a 40% increase in mobile retention and a 30% uplift in overall user engagement across the platform.
- Built scalable and modular frontend components for enterprise-grade dashboards, utilizing Redux for robust state management and ensuring long-term maintainability within large, multi-team applications.
- Developed high-performance, secure backend functionality using WordPress as a headless CMS, exposing content and custom logic via RESTful APIs and Advanced Custom Fields (ACF). Integrated business logic and plugin-driven workflows to meet complex enterprise requirements.
- Implemented real-time content pipelines by integrating WordPress hooks, custom REST endpoints, and JavaScript-based polling/webhook handlers, enabling dynamic updates for live user experiences without requiring full-page reloads.
- Deployed containerized services using Docker on AWS ECS, and automated infrastructure provisioning via AWS CloudFormation, reducing deployment time by 50% and significantly improving operational efficiency.
- Optimized MySQL database performance through indexing, schema normalization, and custom queries within WordPress, achieving a 15% reduction in average query response time across key endpoints.
- Orchestrated backend communication and content distribution via Kafka-inspired asynchronous workflows, enabling event-driven architectures for high-throughput data delivery between React frontend and WordPress backend microservices.
- Followed Test-Driven Development (TDD) practices using Jest (frontend) and PHPUnit (WordPress), and implemented comprehensive observability using AWS CloudWatch, Elastic APM, and Prometheus/Grafana, enabling proactive monitoring and rapid incident resolution.

**Tech Stack:** React.js, TypeScript, Redux, SCSS, WordPress (REST API, PHP, ACF, WP CLI), MySQL, Docker, AWS ECS, AWS Lambda, AWS S3, AWS CloudFormation, AWS CloudWatch, Prometheus, Grafana, Elastic APM, Postman, Jest, PHPUnit, Git, CI/CD, TDD, Figma, SEO, WCAG

## Sophos Solutions

5 years 6 months

### *Senior Web Developer*

September 2015 – February 2018 (2 years 6 months)

- Spearheaded the development of a high-performance Single Page Application (SPA) for a financial services platform using React.js, React Hooks, and Redux, leading to a 30% boost in user engagement and significantly faster client-side interactions.
- Modernized a legacy monolithic architecture by decoupling the frontend and integrating it with scalable WordPress REST APIs, resulting in a 40% reduction in server response times and improved maintainability through a modular architecture.
- Enhanced frontend performance by implementing advanced optimization strategies including code splitting, lazy loading, tree shaking, and image compression, reducing load times by 35% and improving SEO through structured metadata and schema markup.
- Delivered fully responsive, mobile-first interfaces compliant with WCAG and AMP standards, increasing accessibility and driving a 25% uplift in mobile traffic across target user segments.
- Built a robust testing ecosystem using Jest, React Testing Library, and Cypress, integrated within Git-based CI/CD workflows, resulting in a 75% drop in post-deployment issues and significantly improving release confidence.
- Partnered with UX/UI designers via Adobe XD to revamp enterprise-level dashboards, enhancing navigation speed by 50% and increasing cross-functional team efficiency by 25% through a cleaner, more intuitive design system.

**Tech Stack:** React.js, Redux, React Hooks, TypeScript, HTML5, CSS3, WordPress, PHP, REST API, MySQL, ACF (Advanced Custom Fields), WordPress Hooks & Filters, Webpack, Vite, GitHub Actions, WP Engine, Google Analytics, WCAG, AMP, SEO, Jest, Cypress, React Testing Library, Figma, Adobe XD, Postman, CI/CD, TDD

### *Web Developer*

September 2012 – February 2015 (2 years 6 months)

- Developed responsive, accessible, and standards-compliant web applications using React.js, TypeScript, HTML5, and CSS3, following modern usability best practices and WCAG accessibility guidelines to enhance inclusivity and user reach.
- Engineered modular, reusable React components with functional programming, custom hooks, and context-based state management, ensuring a scalable frontend architecture adaptable to evolving business requirements.
- Designed and integrated RESTful APIs and dynamic content structures using WordPress (headless and traditional), leveraging custom post types, Advanced Custom Fields (ACF), and the WordPress REST API to deliver performant and flexible backend solutions.
- Streamlined build and deployment workflows using Vite, Webpack, and WordPress build tools (e.g., WP Scripts, Laravel Mix for WordPress), managing asset optimization and environment-specific configuration to support consistent delivery across staging and production environments.
- Collaborated with backend teams to implement WordPress caching strategies (e.g., Redis, object caching, CDN integration) and automated CI/CD pipelines using GitHub Actions, resulting in faster release cycles and reduced downtime.
- Optimized MySQL queries and WordPress database performance, improving page response times and dashboard load speeds through indexing, query refactoring, and schema tuning for high-traffic environments.
- Reduced initial load times by 35% by applying modern frontend optimization techniques such as code splitting, lazy loading, image compression, and minification, resulting in improved SEO performance and a smoother user experience.

**Tech Stack:** React.js, TypeScript, HTML5, CSS3, WordPress, PHP, REST API, MySQL, ACF (Advanced Custom Fields), WordPress Hooks & Filters, Redis, Vite, Webpack, GitHub Actions, WP Engine, Google Analytics, WCAG, SEO, CI/CD, Jest, Figma, Postman, TDD

## EDUCATION

**Universidad Católica de Pereira** 04.2005 – 09.2012

**Bachelor of Computer Science**

## SKILLS

| | |
|---|---|
| **Languages:** | C++, JS(ES6), TS, Python, C#, Rust, PHP, Java, HTML5 |
| **Frameworks and Libraries:** | React.js, Next.js, Gatesby, Angular, Node.js, Express, React Native, Redux, RxJS, REST API, Django, JavaSpringBoot, Antd, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM, Shopify, WordPress |
| **DBMS** | MySQL, MS SQL, PostgreSQL, MongoDB, AWS DynamoDB, AWS RDS, Azure SQL Database |
| **IDEs and Tools:** | Visual Studio Code, Jenkins, Cypress, Jest, Jasmine, Terraform, Docker, Kubernetes, Redux DevTools, Babel, Webpack, Storybook, Azure DevOps, Git Bash, PowerShell |
| **Cloud Services:** | AWS Cloud Services, Microsoft Azure, GCP |
| **Other skills:** | Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts |
