Sebastian Tamayo

Senior Software Engineer

+57 3113698653• sebstiantamayo629@outlook.com• https://www.linkedin.com/in/sebastian-tamayo-pro/ • Pereira, Colombia

Accomplished Senior Web Developer with over a decade of experience designing, developing, and optimizing scalable, high-performance web applications. Expert in crafting intuitive, mobile-first interfaces using Vue.js, and architecting secure, extensible backend systems with PHP Laravel and RESTful APIs.

Proficient across the full software development lifecycle—from system architecture and relational/NoSQL data modeling to CI/CD automation, comprehensive testing strategies, and cloud-native deployments on AWS and Docker/Kubernetes. Thrives in Agile, cross-functional teams, consistently delivering user-centered, business-aligned solutions through rapid iteration and close collaboration with stakeholders.

Renowned for producing clean, maintainable, and testable code while mentoring engineering teams and championing best practices grounded in SOLID principles, clean architecture, and Test-Driven Development (TDD). Skilled in frontend performance optimization, modular Vue component architecture, and building scalable, resilient backend services with Laravel, Redis, and Laravel Horizon.

Driven by a passion for innovation and continuous learning, with deep expertise in modern JavaScript frameworks, the Laravel ecosystem, and DevOps tooling. Dedicated to delivering impactful, real-world software solutions that enhance user experience and generate measurable business value.

PROFESSIONAL EXPERIENCE

UST

Senior Software Engineer

June 2022 – June 2025 (3 years)

- Collaborated within a cross-functional Agile Scrum team, mentoring junior engineers and conducting thorough code reviews rooted in SOLID principles, modern design patterns, and clean architecture, ensuring long-term scalability and maintainability across frontend and backend codebases.
- Revamped a high-traffic, customer-facing application by developing a Vue.js frontend with responsive, mobile-first design, WCAG-compliant accessibility, and real-time user interactions. Integrated live auction streaming via AWS IVS and third-party systems like the Shopify Storefront API, resulting in measurable improvements in user engagement and conversion rates.
- Engineered scalable backend services using PHP Laravel and Laravel Sanctum for secure API token authentication. Built modular RESTful APIs leveraging Eloquent ORM for efficient data modeling, transactional integrity, and flexible schema design in a PostgreSQL environment.
- Architected a modular, service-oriented backend deployed using Docker and orchestrated via Amazon ECS. Enabled asynchronous processing and real-time communication with Laravel Queues (Redis) and Laravel WebSockets (Pusher), enhancing system responsiveness and horizontal scalability.
- Led the development of an AI-powered chatbot using AWS Lex, AWS Lambda, and Amazon DynamoDB, providing dynamic, context-aware automation and improving customer support efficiency across multiple user touchpoints.
- Optimized frontend performance using Vue's lazy loading, dynamic imports, component memoization, and Vite build optimizations. On the backend, boosted Laravel app performance with query optimization, caching via Redis, and Laravel Octane, reducing page load times by 30%.
- Built and maintained robust CI/CD pipelines using GitHub Actions and Jenkins. Integrated automated testing using PHPUnit, Vue Test Utils, and Cypress for full-stack test coverage, enabling faster release cycles and reducing regression defects across environments.

Tech Stack: Vue.js, Pinia (Vuex), TypeScript, HTML5, SCSS, PHP, Laravel, REST API, PostgreSQL, Redis, DynamoDB, WebSockets, Shopify Storefront API, AWS (ECS, Lambda, IVS, Lex, S3, CloudWatch), Docker, GitHub Actions, Jenkins, PHPUnit, Vue Test Utils, Cypress, Webpack, Vite, WCAG, Figma, Postman, SEO, TDD

Gorilla Logic

Full Stack Engineer

February 2018 – May 2022 (4 years 4 months)

- Designed and implemented responsive, mobile-first user interfaces using Vue.js, TypeScript, and SCSS, driving a 40% increase in mobile user retention and a 30% boost in overall platform engagement.
- Developed scalable, reusable component libraries for enterprise dashboards, leveraging Pinia (or Vuex) for centralized state management, enabling consistency and efficiency across multiple frontend teams.
- Engineered secure, high-performance backend services with PHP Laravel, building clean, modular RESTful APIs while following domain-driven design principles and Laravel Eloquent ORM best practices.
- Enabled real-time dynamic content delivery using Laravel Echo with WebSockets and Server-Sent Events (SSE), facilitating seamless UI updates for live notifications and dashboards.
- Deployed containerized Laravel microservices using Docker on AWS ECS, automating infrastructure provisioning through AWS CloudFormation, which improved release velocity and ensured consistent environments.
- Optimized backend performance via advanced MySQL query tuning, schema normalization, and indexing strategies, reducing API response times by 15% during peak loads.
- Implemented asynchronous task processing and decoupled communication using Laravel Queues with Redis and optionally RabbitMQ, boosting scalability, fault tolerance, and backend responsiveness.
- Followed Test-Driven Development (TDD) using PHPUnit and Vue Test Utils, and established a robust monitoring stack with Prometheus, Grafana, Elastic APM, and AWS CloudWatch, enabling proactive observability and rapid incident response.

Tech Stack: Vue.js, Pinia (Vuex), TypeScript, SCSS, PHP, Laravel, Laravel Echo, REST API, Laravel Queues, MySQL, Redis, RabbitMQ, WebSockets, SSE, Docker, AWS (ECS, Lambda, S3, CloudFormation, CloudWatch), Prometheus, Grafana, Elastic APM, Git, CI/CD, PHPUnit, Vue Test Utils, Postman, Figma, SEO, WCAG, TDD

Sophos Solutions

5 years 6 months

Senior Web Developer

September 2015 – February 2018 (2 years 6 months)

- Spearheaded the development of a high-performance Single Page Application (SPA) for a financial services platform using Vue.js, Composition API, and Pinia (or Vuex), resulting in a 30% increase in user engagement and significantly faster client-side performance.
- Modernized a legacy monolith by decoupling the frontend and integrating it with scalable, secure RESTful APIs developed using Laravel and Laravel Sanctum, improving server response time by 40% and enabling maintainable service-oriented architecture.
- Enhanced frontend performance through advanced optimization techniques including code splitting, lazy loading, tree shaking, and asset compression, leading to a 35% reduction in page load times and improved SEO through structured metadata, Open Graph, and JSON-LD schema integration.
- Delivered fully responsive, mobile-first interfaces in compliance with WCAG 2.1 accessibility guidelines and optimized for Google AMP, contributing to a 25% growth in mobile traffic and higher Lighthouse performance scores.
- Developed and maintained a robust frontend and backend testing suite using Vue Test Utils, Jest, Cypress, Laravel Dusk, and PHPUnit, with full CI/CD automation via GitHub Actions, reducing post-release bugs by 75%.
- Collaborated with UI/UX teams in Figma and Adobe XD to implement a modern, modular component system for complex financial dashboards, enhancing navigation performance by 50% and streamlining cross-team development efforts.

Tech Stack: Vue.js, Composition API, Pinia (Vuex), TypeScript, HTML5, SCSS, PHP, Laravel, Laravel Sanctum, REST API, MySQL, Redis, Laravel Mix, Vite, Webpack, GitHub Actions, Jenkins, Laravel Dusk, PHPUnit, Cypress, Playwright, Jest, Vue Test Utils, Postman, WCAG, Google AMP, SEO, Open Graph, JSON-LD, Google Analytics, Adobe XD, Figma, CI/CD, TDD

Web Developer

September 2012 – February 2015 (2 years 6 months)

- Developed responsive, accessible, and standards-compliant web applications using Vue.js, TypeScript, HTML5, and SCSS, ensuring cross-browser consistency, WCAG 2.1 compliance, and improved engagement across desktop and mobile users.
- Engineered reusable and modular Vue components utilizing the Composition API, Vue Router, and Pinia (or Vuex) to create scalable frontend architectures aligned with long-term product growth and design system principles.
- Designed and integrated RESTful APIs using Laravel and Laravel Sanctum, delivering secure and extensible backend services to power complex workflows and structured business logic.
- Optimized development workflows by configuring Vite, Webpack, and Laravel Mix, automating environment-specific builds and streamlining asset bundling for production-ready deployments.
- Collaborated with backend developers to implement caching strategies using Redis and Laravel's Cache and Queue APIs, significantly improving server response times and scalability under high load.
- Tuned MySQL performance through query optimization, index planning, and Eloquent ORM profiling to reduce latency and increase throughput for data-heavy endpoints.
- Reduced frontend load times by 35% using code splitting, lazy loading, image compression, and minification, contributing to improved SEO performance and faster time-to-interactive for users.
- Maintained robust testing coverage using Jest, Laravel Dusk, and PHPUnit, integrated into GitHub Actions pipelines for continuous delivery and post-deployment validation.

Tech Stack: Vue.js, TypeScript, HTML5, SCSS, Composition API, Vue Router, Pinia (Vuex), PHP, Laravel, Laravel Sanctum, REST API, MySQL, Redis, Laravel Mix, Vite, Webpack, GitHub Actions, Jenkins, Azure App Service, Google Analytics, SEO, WCAG, CI/CD, Postman, Jest, Laravel Dusk, PHPUnit, TDD, Figma

EDUCATION

Universidad Católica de Pereira 04.2005 – 09.2012

Bachelor of Computer Science

SKILLS

Languages:	C++, JS(ES6), TS, Python, C#, Rust, PHP, Java, HTML5
Frameworks and Libraries:	Vue.js, Vuex, Nuxt, React.js, Next.js, Gatesby, Angular, Node.js, Express, React Native, Redux, RxJS, REST API, Django, JavaSpringBoot, Antd, GraphQL, Ably, Laravel, Tailwind CSS, RabbitMQ, Kafka, TypeORM, Shopify, WordPress
DBMS	MySQL, MS SQL, PostgreSQL, MongoDB, AWS DynamoDB, AWS RDS, Azure SQL Database
IDEs and Tools:	Visual Studio Code, Jenkins, Cypress, Jest, Jasmine, Terraform, Docker, Kubernetes, Redux DevTools, Babel, Webpack, Storybook, Azure DevOps, Git Bash, PowerShell
Cloud Services:	AWS Cloud Services, Microsoft Azure, GCP
Other skills:	Problem Solving, Full Stack Development, Critical Thinking, Leadership, Algorithm Design, Team-Oriented, SOLID, Agile (Scrum), Microservices, Test-Driven Development (TDD), Diagnosing, Business Analysts
